

Oracle 1Z0-430 Exam

Volume: 80 Questions

Question No: 1

In which file should customization classes be specified in the cust-config section (under mds-config)?

- A. web.xml
- B. weblogic.xml
- C. adf-config.xml
- D. adfm.xml

Answer: C

Question No: 2

Which two scoped managed beans must be Serializable in order to work without errors in a highly available application?

- A. Session scope
- B. Backing bean scope
- C. View scope
- D. Transient scope

Answer: B,C

Question No: 3

The DesignWebCenterSpaces application contains a file called config.properties.

What is the purpose of this file?

- A. To enable a connection between JDeveloper and the Portal server. This will be used to upload and download assets directly from JDeveloper.
- B. It allows the developer to configure which asset types can be created or edited with this application.
- C. It is used to store classpath and library information, and the path to executables. That way, a local Portal instance can be started from JDeveloper.

Oracle 1Z0-430 Exam

D. It is an internally used file. Developers should not have to manually configure this file, except when required by Oracle to do so.

Answer: A

Question No: 4

While creating a Portal Template, you add a content facet and a panelCustomizable component into the template.

What impact does this have during run time?

- A. The content facet is required to hold content, and panelCustomizable is used to allow runtime editing.
- B. The template is missing the pageCustomizable component, which allows runtime editing.
- C. The content facet is optional, whereas panelCustomizable must be added to the template to allow editing.
- D. The panelCustomizable component is not required for editing, but only to allow drag and drop. This component is mandatory.

Answer: D

Question No: 5

WebCenter Portal supports any mail server with IMAP4 and SMTP protocol support.

Which server distribution, however, has specific integration support within WebCenter Portal?

- A. IBM Lotus Notes
- B. MS Exchange
- C. UNIX Mail Server
- D. Google Mail Server
- E. Oracle Beehive

Answer: E

Question No: 6

Which option correctly describes the relationship between WebCenter Portal and ADF?

Oracle 1Z0-430 Exam

- A. ADF is the development framework in which WebCenter Portal is based, and also the framework recommended for custom development (of portlets, taskflows, and templates).
- B. ADF is the development framework recommended for taskflow development. WebCenter Portal has an ADF integration gateway to support ADF taskflows.
- C. ADF is the integration layer for WebCenter Portal. All communication with external applications is done through ADF standards.
- D. ADF is an architectural concept for developing web applications using an MVC (model-view-controller) framework. ADF has a set of models that can be used to speed up development time.

Answer: C

Question No: 7

Which three statements are true in the context of WebCenter Portal customizations?

- A. WebCenter Portal Administrator changes the logo of the WebCenter Portal. This is an application customization.
- B. A moderator of a specific portal grants rights to create, view, and delete discussions. This is a user customization.
- C. A user changes the attributes of the task flow, to minimize it by default. This is a user customization.
- D. An application specialist edits a portal to hide a task flow. This is an application customization.

Answer: A,B,C

Question No: 8

On a normally well-performing environment, you are experiencing unexpected slow response times, or no server response, for some page requests in WebCenter Portal? You are attempting to debug this issue starting at WLS.

Which two diagnostic steps should you take to resolve this issue?

- A. Submit more requests to the server to see if it responds.
- B. Check the WLS admin console to see the status of the managed server.
- C. Check the diagnostic log file for the managed server to see if there are STUCK threads.

Oracle 1Z0-430 Exam

D. Perform a cold restart of the server.

Answer: C,D

Question No: 9

Which is true for portals created in the WebCenter Portal 11.1.1.8 version?

A. A new portal created in 11.1.1.8.0 references a global default navigation model.

B. A new portal created in 11.1.1.8.0 contains a local navigation model.

C. A new portal created in 11.1.1.8.0 contains a local read-only navigation model.

D. A new portal created in 11.1.1.8.0 does not contain any navigation model.

Answer: B

Question No: 10

Which two options are required when configuring Portal in a clustered environment?

A. ensuring each Portal server has its own content server

B. enforcing Sticky Sessions on the Load Balancer, which handles the requests for the Portal application

C. hosting all portal instances on the same server

D. configuring session replication between the Portal cluster nodes

Answer: A,C

Question No: 11

Which statement is not true?

A. Responsive Design allows a page to change content visibility and or layout in the browser if the browser is resized.

B. A page using Responsive Design is refreshed in the portal server when the size of the browser is changed.

C. Responsive Design includes adding server-side logic to conditionally display areas on a page.

Oracle 1Z0-430 Exam

D. Responsive Design allows pages to target more than one device size or orientation.

Answer: D

Question No: 12

Which three steps are needed for using custom task flows with business components in multiple portals?

A. Create the task flow in each portal.

B. Create the task flow once in JDeveloper.

C. Deploy it once as a portal shared library to WebCenter Portal server.

D. Import the task flow in each portal.

E. Add the task flow to the desired resource catalogs.

F. Download and update portal MDS (metadata data services) customizations for each portal.

Answer: B,D,E

Question No: 13

Which two WebCenter Content components must be enabled for the WebCenter Portal content integration?

A. Site Studio (for uploading files)

B. WebCenterConfigure

C. Folders_G and FrameworkFolders

D. Folders_G or FrameworkFolders

E. InBound Refinery

Answer: A,C

Question No: 14

What three configurations have to be done to ensure that a portal can correctly display content from WebCenter Content server?

Oracle 1Z0-430 Exam

- A. OHS (Oracle HTTP Server) configured to front end both WebCenter Portal and WebCenter Content
- B. WebCenter Portal and Content running on the same server
- C. an SSO (Single Sign-On) solution configured between WebCenter Portal and WebCenter Content
- D. web context root set on the content repository connection
- E. WebCenter Portal and Content configured in the same WebLogic server domain

Answer: B,C,E

Question No: 15

In WebCenter Portal server, how do you definitively disable the ability to create a portal?

- A. Edit your page template and remove the “Create Portal” links.
- B. This feature cannot be disabled because it is an integral part of WebCenter Portal.
- C. Revoke the Create Portal application permission from authenticated users.
- D. You can disable the portal creation feature by using a system parameter.

Answer: C

Question No: 16

Your customer has configured Oracle Secure Enterprise Search (SES) with Oracle WebCenter Portal. The customer is complaining about the search results not including secured resources. The WebCenter Diagnostic log file indicates the below error:

Received status “failed” during proxy login with application entity “weblogic” to Oracle SES at http://host:port/search/query/OracleSearch, as search user “vicki”. Defaulting to public.

Which three actions are necessary to resolve the issue?

- A. Confirm that Oracle SES is configured with an identity management system to validate and authenticate users.
- B. Confirm that WebCenter Portal and Oracle SES use different identity management systems (Active Directory or Oracle Internet Directory).
- C. All repositories (such as WebCenter Portal, WebCenter Content Server, and Oracle WebCenter Portal Discussions Server) must share the same user base as Oracle SES.

Oracle 1Z0-430 Exam

D. Oracle SES must have a trusted entity for allowing WebCenter Portal end users to be securely propagated at search time.

Answer: B,C,D

Question No: 17

Your client is developing page templates and pages for their portal using primarily Portal Builder. During the process of building this Portal, the client uses Portal Builder and JDeveloper.

Identify the initial step required to perform this round-trip development.

A. Choose the “Save Portal” option in the Portal Administration page.

B. Export the WebCenter Portal’s database schema.

C. Choose “Export” from the portal assets page in the Portal Builder page and save the portal asset to an archive.

D. Connect JDeveloper to the Portal server and edit the asset online.

Answer: B

Question No: 18

As the moderator of a portal, you want to delegate all management to another user except the ability to manage membership.

How do you accomplish this?

A. Grant the user the “Manage All” permission on the portal.

B. Grant the user the “Manage Configuration” permission on the portal.

C. There can be only one moderator of a portal.

D. This is not a supported feature in WebCenter Portal.

Answer: C

Question No: 19

Which role can make a portal available for self-subscription?

A. No roles can do this; it is not a feature.

Oracle 1Z0-430 Exam

- B. The Moderator role can do this.
- C. All seeded roles have this capability, but custom roles do not have it.
- D. The Administrator can enable any role to do this.

Answer: B

Question No: 20

Users Lucy and Tom are editing a page or task flow simultaneously using Page Composer. Lucy deletes a component while Tom is trying to personalize (for example, move) that same component in View mode. What three things happen?

- A. A WebCenter error page is displayed to Tom.
- B. Tom cannot perform any action while Lucy is editing the page.
- C. The deleted component does not appear, and Tom can continue working on other components.
- D. Tom has to simply navigate back to the original page.

Answer: A,B,D

Question No: 21

You take a backup of a portal and then delete it. Another administrator then creates a new portal with same name as the portal you deleted. If you attempt to re-import the original portal that was backed up, what happens?

- A. The portal is imported, overwriting the portal with the same name in the target.
- B. There is a conflict warning, but you can override it and then import the portal.
- C. The portal is renamed post import.
- D. The portal cannot be imported.

Answer: A

Question No: 22

Identify two actions that are performed when you connect WebCenter Portal with WebCenter Content.

Oracle 1Z0-430 Exam

- A. A new folder is created in WebCenter Content, with the name of the connection.
- B. New Security Group and Accounts are created. All Portal documents use the Security Group and Accounts.
- C. The Content Presenter and other task flows are deployed to the Portal once you create the connection.
- D. Portal will start indexing WebCenter Content documents to enable full-text searching in the Portal.

Answer: B,C

Question No: 23

Which statement is true?

- A. If you want to use a certain page style to create a portal page, you have to upload it on the assets page of this portal.
- B. You cannot create a subpage that has a different security from its parent.
- C. When creating a portal page/subpage for a new portal created in 11.1.1.8, you are also creating a navigation item for its default portal navigation.
- D. You cannot change a portal page's direct URL after its creation.

Answer: C

Question No: 24

What two are prerequisites for OBIEE and WebCenter Portal (WCP) integration?

- A. SSO is configured.
- B. Common user names must be present in OBIEE and WCP.
- C. The data source for the OBIEE schema must be configured on the WCP domain.
- D. The deployment of WebLogic Server must be shared.
- E. MBean for the SOAP connection to the BI server is configured.
- F. JMS queue for BI report update events on the WCP domain is configured.

Oracle 1Z0-430 Exam

Answer: B,E

Question No: 25

After a task flow has been deployed as a new shared library, which step is required in the portal extension project to make this task flow visible from WebCenter Portal?

- A. Update only weblogic.xml.
- B. Update only MANIFEST.MF.
- C. Update both files.
- D. None, because a shared library is used.

Answer: C

Question No: 26

Which two key tasks can be performed in JDeveloper?

- A. Create Page Styles
- B. Deploy Assets to Portal Server
- C. Preview Portal on a mobile device
- D. Create Page Variants

Answer: A,C

Question No: 27

You want all uploaded policy documents in HR Portal to have additional fields containing certain attributes (name, start date, and end date), which end users must fill as part of the document upload process using the WebCenter Portal Document Manager task flow.

How can you accomplish this?

- A. On WebCenter Content, create a content type with specific extension.
- B. Create a Content Profile on WebCenter Content with appropriate rules.
- C. Create a folder titled "Policy" and upload all documents to it.
