**Volume: 133 Questions**

Question No: 1

Which features are created automatically once you define a transport domain controller in an (ABAP-based) SAP landscape?

There are 4 correct answers to this question.

- A. The user TMSADM is created.
- B. The TMS configuration is stored in the database and the file system.
- C. The RFC destinations required for the TMS are generated.
- D. The transport profile for the transport control program tp is generated in the database.
- E. The transport profile for the transport control program tp is generated in the file system.

Answer: A,B,C,E

Question No: 2

Which applications/solutions are parts of SAP Business Suite?

There are 3 correct answers to this question.

- A. SAP SRM
- B. SAP SOA
- C. SAP ERP
- D. SAP Business One
- E. SAP CRM

Answer: A,C,E

Question No: 3

You are running an AS ABAP-based SAP system. The SAP <SID> is set to LNX and the <SCHEMA- ID> is set to SR3. Which of the following database users is created when the database and the SAP system are installed? (Choose correct answer)

## **SAP C TADM51 74 Exam**

- A. ORASR3
- B. ORALNX
- C. SAPSR3
- D. SAPLNX

Answer: C

Question No: 4

You are performing an SAP system upgrade of an AS ABAP-based development system. When do you perform the modification adjustments for ABAP Dictionary objects using transaction SPDD (Modification Adjustment Dictionary)?

Please choose the correct answer.

- A. During the upgrade after the first kernel switch (KX\_SWITCH\_1)
- B. During the upgrade before activation of table definitions (ACT\_UPG)
- C. After the upgrade (EXIT)
- D. In the upgrade preparation phases (Roadmap steps 1-4)

Answer: B

Question No: 5

Which tool do you use to maintain memory settings for the Java Virtual Machine of a AS Java-based SAP system?

Please choose the correct answer.

- A. Shell Console Administrator
- B. Visual Administrator
- C. Config Tool
- D. SAP NetWeaver Administrator (NWA)

Answer: C

## **SAP C TADM51 74 Exam**

Question No: 6

Oracle database release 10g is able to use new database statistic features for tables and index. Which statement regarding CBO (Cost-based optimizer) and RBO (Rule-based optimizer) is true?

There are 3 correct answers to this question.

- A. Database statistics can be managed automatically in Oracle 10g. This is implemented in the database as the dbms\_scheduler job GATHER\_STATS\_JOB. However, this method is not yet supported and is deactivated to avoid conflicts with the brconnect methods.
- B. Oracle 10g only supports CBO, while the RBO is not supported anymore.
- C. As of Oracle 10g, you are required to create statistics for the Oracle dictionary as well.
- D. In Oracle 10g, both CBO- and RBO-based index statistics can be used simultaneously.

Answer: A,B,C

Question No: 7

Which of the following statements regarding SAP connect are correct?

Choose the correct answer(s).

- A. As of AS ABAP 6.10, a Microsoft Exchange Infrastructure must be set up outside the SAP system to be able to send mail from SAP systems.
- B. SAP connect is configured cross-client.
- C. It is not possible to connect the UNIX-based send mail to SAP systems.
- D. SAP connect allows you to send mail both by RFC and the SMTP plug-in of the SAP AS ABAP.
- E. A send process automatically runs periodically in every SAP system after the system installation.

Answer: D

Question No: 8

You are running a system landscape of AS ABAP-based SAP systems. What characterizes a transport domain?

Please choose the correct answer.

- A. All systems act as a backup domain controller.

## **SAP C TADM51 74 Exam**

- B. All systems have a common transport domain controller.
- C. All systems are connected with a transport domain controller via transport routes
- D. All systems have a common transport directory.

Answer: B

Question No: 9

Which data sources are supported by the User Management Engine (UME) of AS Java?  
There are 3 correct answers to this question.

- A. A Directory Server (via LDAP)
- B. A file on operating system level (secure store)
- C. A client of an AS ABAP-based SAP system
- D. An UDDI provider
- E. The database of the AS Java

Answer: A,C,E

Question No: 10

Identify the activity that is not performed by Installation Check.  
Choose the correct answer(s).

- A. Completeness of installation
- B. Version compatibility
- C. Network security
- D. Accessibility of the message server

Answer: C

Question No: 11

Which statements concerning transport routes are correct

## **SAP C TADM51 74 Exam**

Choose the correct answer(s).

- A. If you want to export transport requests from an SAP system, there needs to be at least one consolidation route starting from this SAP system.
- B. If you want to export transport requests from an SAP system, there needs to be at least one delivery route starting from this SAP system
- C. If you want to export transport requests from an SAP system, there needs to be at least one export route starting from this SAP system
- D. SAP distinguishes between export routes and import routes
- E. SAP distinguishes between consolidation routes and delivery routes

Answer: A,E

Question No: 12

Your business requires data synchronization between one client (source client) in an AS ABAP-based SAP system (source system) and three different clients (target clients) in a second AS ABAP-based SAP system (target system).

How do you implement this requirement using RFC technology?

Please choose the correct answer.

- A. Define RFC connections between the three clients in the target system.
- B. Define three RFC connections to the target clients in the source system.
- C. Define three RFC connections to the source client in the target system.
- D. Define one broadcast RFC connection of type "M" (multiple targets) to the target system in the source system.

Answer: B

Question No: 13

Which of the following statements regarding the monitoring of an AS ABAP + Java system are true, when you are using a separate central monitoring system?

Please choose the correct answer

- A. The central monitoring system must have the System ID "CEN".
