

Huawei H13-622 Exam

Volume: 178 Questions

Question No: 1

When configuring an N8500 clustered NAS engine, a user must specify the start and end physical IP addresses and the start and end virtual IP addresses,

- A. TRUE
- B. FALSE

Answer: B

Question No: 2

Which of the following statements about N8500 troubleshooting is incorrect?

- A. Check file system configurations, and then check storage device configurations.
- B. Check network connection, and then check NAS device configurations.
- C. Check device indicators, and then check system logs.
- D. Check the status of storage unit disk enclosures, and then check the status of storage unit controller enclosures.

Answer: D

Question No: 3

In performance optimization of the N8500 clustered NAS storage systems, which of the following issues must the maintenance personnel be aware of concerning LUNs and controllers? (Select 3 answers)

- A. Create only one LUN for each RAID group.
- B. Set LUNs to forcible write back without mirroring.
- C. Ensure that the owning controller and the working controller of a LUN are the same.
- D. Disks that compose a file system are evenly distributed on controllers.

Answer: A,C,D

Huawei H13-622 Exam

Question No: 4

Which of the following statements about the VCS services and resources provided by a clustered NAS system are correct? (Select 3 answers)

- A. A dependency relationship between service groups can be defined.
- B. A dependency relationship between resources can be defined,
- C. Each resource corresponds to one agent.
- D. Resource dependency relationships can be defined in a cyclic manner.

Answer: A,B,C

Question No: 5

The CIFS sharing of the OceanStor 9000 supports local user authentication and AD domain user authentication.

- A. TRUE
- B. FALSE

Answer: A

Question No: 6

A customer has purchased an N8500 clustered NAS storage system configured with SATA and NL-5AS disks. In order to strike a balance between RAID reliability and read/write performance, which of the following configuration plans is recommended?

- A. 11-disk RAID 5 and one hot spare disk
- B. 11-disk RAID 6 and one hot spare disk
- C. 4-diskRAID10
- D. 9-disk RAID 5

Answer: B

Question No: 7

Huawei H13-622 Exam

The flexible space of the OceanStor 9000 is attributed to the scale-out architecture, scalability from 3 to 288 nodes, and support for global namespace.

- A. TRUE
- B. FALSE

Answer: A

Question No: 8

A NAS storage system is dedicated to storing and managing which of the following data types?

- A. Block data
- B. File data
- C. Object data
- D. Consecutive data blocks

Answer: B

Question No: 9

When configuring file systems for the N8500 clustered NAS storage systems, you are advised to configure a file system size not larger than 32 TB and the size of small-file storage applications not larger than 16 TB to achieve satisfactory reliability and data recovery speed. (The small files here refer to the files with an average size of 1 MB.)

- A. TRUE
- B. FALSE

Answer: B

Question No: 10

You can use the HUAWEI OceanStor Toolkit to perform the operations such as preventive maintenance, information collection, and upgrade for the HUAWEI OceanStor 9000.

- A. TRUE

Huawei H13-622 Exam

B. FALSE

Answer: A

Question No: 11

The HUAWEI OceanStor 9000 can be managed using web browsers. If an OceanStor 9000 storage system uses default settings, which of the following entered in the browser address box is correct?

A. https://IP:httpsport/webui

B. http://IP:httpsport/tools

C. http://IP:httpsport

D. https://IP:httpsport

Answer: A

Question No: 12

Which command is used to monitor the CPU usage in performance optimization of the N8500 clustered NAS storage systems?

A. sar -u 3 3

B. sar -r 3 3

C. sar -n DEV 2 2

D. sar -n CPU 2 2

Answer: A

Question No: 13

The HUAWEI OceanStor Toolkit V100R001 is used for information collection. When importing a service package, you can find the service package in the datacollect folder under toolcases.

A. TRUE

B. FALSE

Huawei H13-622 Exam

Answer: A

Question No: 14

Which of the following statements about the InfoQuota feature of the OceanStor 9000 are correct? (Select 3 answers)

- A. Quotas can be set based on users,
- B. Quotas can be set based on user groups.
- C. Quotas can be set for file directories,
- D. Quotas can be set for files.

Answer: A,B,C

Question No: 15

Which of the following storage units are used by an N8500 clustered NAS system? (Select 3 answers)

- A. S2200T
- B. S2600T
- C. S5500T
- D. S6800T

Answer: B,C,D

Question No: 16

Which of the following statements about CIFS service parameter settings on an OceanStor 9000 storage system is incorrect?

- A. When the domain authentication mode is used, local users are not allowed to access CIFS shared directories.
- B. When the user authentication mode is used, domain users are not allowed to access CIFS shared directories.
- C. If you want users to access CIFS shared directories without entering user names or passwords, enable
