Total Question: 76 QAs

Question No: 1

Which two statements are true about the role of Oracle Business Rules in Adaptive Case Management (ACM)?

- A. Defining business rules is mandatory to be able to build, deploy, and run an ACM project.
- B. Business rules are used to handle case events and take specific actions on the case.
- C. Business rules are used to activate conditional case activities.
- D. Oracle Business Rules is an optional component of ACM.

Answer: C,D

Question No: 2

Which two features are provided on the Tasks page of Business Process Workspace?

- A. Display Status for Adaptive Case Management (ACM) cases.
- B. View human tasks based on the user's permissions and assigned groups and roles.
- C. Create personal to-do tasks that are unassociated with a process instance.
- D. View who is currently assigned to a task that the current user has completed.

Answer: B,C

Question No: 3

Which statement is true about a case activity that is defined as "Automatic" and "Conditional"?

- A. The activity is run automatically as soon as the case starts.
- B. The activity is run by the system only after it is initiated by the user.
- C. The activity is automatically run by the system as soon as it is activated by a case rule.
- D. Only a BPMN case activity can be defined as "Automatic" and "Conditional".

Answer: B

Question No: 4

You have a requirement to dynamically assign tasks at run time based on the employee's title. Which three could be used to accomplish this assignment? (Choose three.)

- A. Use parametric roles to map the individual parametric role assignments and then map individual users to specific titles in the workspace using extended user properties.
- B. Use parametric roles to map the individual parametric role assignments and then map LDAP groups to specific titles in the workspace using extended user properties.
- C. In LDAP, ensure that individual users have been given titles and, in the workspace, associate the LDAP title attribute to a parametric role.
- D. Use a business rule in the human task to dynamically assign work items to specific users or an LDAP group based on employee title.
- E. In the process, edit the properties of the swimlane and assign a "title" string data object in the process payload to define a parametric role.

Answer: A,B,D

Question No: 5

Which human workflow service is used to get the list of outcomes defined for a task?

- A. IRuntimeConfigService
- B. ITaskQueryService
- C. ITaskService
- D. ITaskMetadataService

Answer: B

Question No: 6

When automatically generating an ADF form from a human task, the difference between using the "Auto-Generate Task Form" and the "Launch Task Form Wizard" is that the ____.

- A. "Launch Task Form Wizard" option launches a six-step "BPM Custom Form Wizard" and the "Auto-Generate" option creates the ADF project, task flow, and ADF form with one key click
- B. "Launch Task Form Wizard" option does not create a new ADF project every time it is run
- C. "Auto-Generate" option gives you the choice to use an existing ADF page template as the form is being created.
- D. "Launch Task Form Wizard" option automatically creates an ADF page template and task flow template

Answer: D

Question No: 7

Which pattern is best handled by using Adaptive Case Management?

- A. straight-through processing requiring no manual intervention
- B. deterministic, human-centric processes
- C. knowledge-based work requiring collaboration
- D. application integration processes

Answer: C

Question No: 8

Which two statements are correct on the use of business objects in a BPM project? (Choose two.)

- A. A business object is defined by a complex data type.
- B. Business objects are often defined in WSDL documents.
- C. A business object can inherit data and behavior from a parent business object.
- D. You can create a business object at either the project level or the process level.

Answer: B,C

Question No: 9

The initial performer of a task is determined by the role associated with the swim lane in which the task is modeled except when you use a(n) ____.

- A. complex task
- B. user task
- C. FYI task
- D. group task

Answer: A

Question No: 10

Which two modeling approaches could be used to handle exceptions thrown by a service? (Choose two.)

- A. subprocess
- B. event subprocess
- C. error and event
- D. error catch event as a boundary event on the service task

Answer: B,D

Question No: 11

You are analyzing the different methods available to manage the life cycle of the OWSM policies in your SOA/BPM environment. Identify two statements that correctly describe OWSM policy attachments. (Choose two.)

- A. Although you can boss attach and detach security policies in JDeveloper, you can detach them only in Enterprise Manager.
- B. An application developer typically uses JDeveloper to create new security policies rather than select them from a prebuilt list.
- C. When you use JDeveloper to associate a security policy with a web service, the policy is not really attached until application development.
- D. OWSM policies can be attached and detached with WLST.

Answer: C,D

Question No: 12

Which statement is true about using a data-first approach in the Web Form Designer?

- A. The process must already have an object-based process variable created.
- B. The human task must already have an object-based data element defined.
- C. A corresponding process data object is automatically created and mapped into and out of the human task.
- D. As widgets are dragged onto the form from the palette, the form's underlying XSD is automatically updated.

Answer: C

Question No: 13

Which three actions are available when using business rules for a case? (Choose three.)

- A. Activate activities.
- B. Set an activity's relevance.
- C. Change a milestone deadline.
- D. Change a required activity to an optional activity.
- E. Modify case data.

Answer: C,D,E

Question No: 14

Which two product features might a process analyst use the most in contrast to a process developer? (Choose two.)

- A. Process simulation.
- B. Business rules.
- C. Mediator services.
- D. Web Forms.
- E. BPM Studio.

F. ADF forms.

Answer: A,D

Question No: 15

Human workflow is implemented as a _____.

- A. component within the BPEL service engine
- B. separate Java server running on WebLogic Server
- C. service engine within the SOA infrastructure
- D. component within the BPMN service engine

Answer: C

Question No: 16

Which two statements are accurate in describing features of Business Process Workspace? (Choose two.)

- A. To see tasks containing a particular word in the task title, you need to create a custom view.
- B. The definition and data for a new view can be shared with a colleague.
- C. A custom view needs to be created to enable the delegation of a task to another user.
- D. In a task view, the task list can be sorted based upon any visible column heading.

Answer: B,C

Question No: 17

A task is considered overdue when _____.

- A. there are no more renewals
- B. the current date is beyond the due date
- C. the current date is beyond the expiration date
- D. the current date is beyond both the expiration date and the due date

Answer: B

Question No: 18

Which three options are human task patterns that cause the token to wait in the calling process until the human task is completed? (Choose three.)

- A. FYI
- B. Initiator
- C. Management
- D. Manual
- E. Group

Answer: B,C,E

Question No: 19

Which two statements are true about business architecture modeling in BPM Suite? (Choose two.)

- A. It fosters a top-down approach that allows for discovery of an organization's processes.
- B. It is required before BPMN modeling can begin for a specific process.
- C. It is supported by enterprise maps, value chain models, and strategy models created in BPM Studio.
- D. It allows you to define high-level processes that span an entire organization.
- E. It uses familiar BPMN notation to graphically describe high-level process areas.

Answer: A,D

Question No: 20

Which two statements are true about using project data objects? (Choose two.)

- A. Any process in the project can access a project data object.
- B. The value of a project data object does not vary between processes.
- C. Project data objects can be used only as input arguments to a process.
- D. Project data objects can be used in data associations and expressions.

Answer: A,D

Question No: 21

Which component enables a shared work environment for a BPM Suite 12c project where process analysts use Process Composer and process developers use BPM Studio?

- A. Oracle Enterprise Repository
- B. Meta Data Services
- C. Process Asset Manager
- D. Apache Derby DB

Answer: C

Question No: 22

You have a situation where a collection of rules might provide a flexible way of externalizing logic in an application.

Which two are accurate considerations to access as you decide to use a decision table or if-then rules? (Choose two.)

- A. The decision table's spreadsheet metaphor is compact and familiar to end users.
- B. Decision tables can use globals while if-then rules cannot.
- C. The logic likely requires more rules if expressed as a decision table.
- D. Unlike with a decision table, an Expression Builder is provided for if-then rules to help you craft condition expressions.
- E. Built-in error prevention features for decision tables can help you build more complete and accurate rules.

Answer: B,E

Question No: 23

In which two tools can you explore the path taken by a running process instance? (Choose two.)

- A. Enterprise Manager
- B. Process Composer
- C. Weblogic Console
- D. Business Process Workspace

Answer: A,D

Question No: 24

What determines the life span of the value in a subprocess data object?

- A. process
- B. task
