Answer: D

Question No: 4

Your retail organization operates its distribution centers Monday through Friday and is closed on weekends and holidays. Naturally, inbound and outbound deliveries cannot be scheduled for days when the distribution centers are closed. What two setup options exist to configure RMS accordingly?

- A. Define the valid supplier-to-De delivery schedules to control purchase order dates.
- B. Define activity schedules for the warehouses to indicate which days they are closed for shipping and receiving.
- C. Utilize mass maintenance by location lists to update the warehouse closed dates for each weekend and holiday.
- D. Create a timeline that indicates which days the warehouses are open for shipping and receiving operations.

Answer: B,C

Question No: 5

Your retail organization has operations in multiple countries, some of which use VAT and other which do not. For countries that do not use VAT, VAT should not be applied to purchase orders made for stores in that country. How should you configure RMS to ensure that this occurs?

- A. Do not associate a VAT region with stores that are VAT-exempt.
- B. Create a VAT region and indicate that the region is VAT-exempt.
- C. Create a VAT region for the VAT-exempt locations and associate a tax code with a rate of zero to the region.
- D. During store setup, indicate as VAT-exempt the stores for which VAT does not apply.

Answer: B
