

Oracle 1Z0-550 Exam

Volume: 77 Questions

Question No : 1

Which are the two main feature option types for installing the EnterpriseOne Platform Pack?

- A. Logic Path Codes
- B. JDBC Driver
- C. Path Code Databases
- D. Data Sources
- E. Deployment Server Location

Answer: A,C

Question No : 2

When assigning a role to a user profile, which two options are available?

- A. Include in *ALL
- B. Role sequence/hierarchy for the user
- C. Effective dates
- D. Role definition
- E. Role security override

Answer: C,D

Question No : 3

EnterpriseOne provides Server Manager as its interface where administrators can capture vital resource information (advanced process metrics & diagnostic tools) of running EnterpriseOne kernels. Which two process types does this apply to?

- A. Security kernel
- B. Call Object kernel

Oracle 1Z0-550 Exam

- C. UBEs
- D. Package kernel
- E. Management kernel

Answer: B,E

Question No : 4

When defining a new Full Package definition for a development workstation, which three are required to be included in the definition?

- A. Foundation
- B. Database
- C. Objects
- D. Features
- E. Parent Package

Answer: B,C

Question No : 5

ACME is exploring different database vendors for their EnterpriseOne Application Server. Which database technology manages database users through the platform OS accounts?

- A. Oracle
- B. SQL Server
- C. Informix
- D. UDB
- E. MSDE

Answer: A

Oracle 1Z0-550 Exam

Question No : 6

Which two statements are NOT configurable options available during the Deployment Server installation?

- A. Installation Directory
- B. Features (EI Files, Path Codes)
- C. JDBC Driver location
- D. Visual C++ Version
- E. Visual C++ Location

Answer: D,E

Question No : 7

ACME is evaluating updating their current environment with the latest EnterpriseOne Update for their release and is concerned that many of their modifications will not carry forward. Which modification violates standard EnterpriseOne Modification Rule Standards and will be COMPLETELY lost during the upgrade?

- A. New Interactive Application with system code 55
- B. Modification to existing EnterpriseOne Named Event Rule
- C. Modification to existing EnterpriseOne C Business Function
- D. New Version for an existing EnterpriseOne UBE Report
- E. User Overrides

Answer: E

Question No : 8

When building a new Update Package that includes multiple objects (including applications, UBEs, and business functions), which of the file types will NOT be updated with the latest objects in the parent package on the deployment server?

- A. bin32V.dll
- B. include*.h

Oracle 1Z0-550 Exam

C. obj*.obj

D. source*.c

E. *.cab

Answer: B

Question No : 9

In a traditional EnterpriseOne installation, in which data source would you typically find the User Overrides table (F98950) for the PD900 environment?

A. Business Data - Prod

B. Central Objects - PD900

C. Control Tables - Prod

D. System - 900

E. Versions - PD900

Answer: B

Question No : 10

ACME has built a full package and noticed there was a problem with the server package build process for one of the business function objects, B9840 included in CINSTALL library, as it reported 'ERROR' in the R9622.pdf. Which log file on an Intel Enterprise Server should be examined to determine the cause of the business function compile problem?

A. SvrPkgBuild.log

B. JDE.log

C. CINSTALL.log

D. B9840.err

E. CINSTALL.sts

Answer: A

Oracle 1Z0-550 Exam

Question No : 11

EnterpriseOne provides Server Manager as its interface where administrators can view information regarding EnterpriseOne. ACME reports that users connected to Web server 1 are performing differently compared to users connected to Web server 2. Which portion of Server Manager would best be utilized to review each server's settings?

- A. Audit History
- B. Configuration Comparison
- C. Server Grouping
- D. Instance Update
- E. Instance Monitoring

Answer: B

Question No : 12

Change Assistant offers the EnterpriseOne administrator another dynamic utility to be able to search for, download, and apply software updates of all varieties for EnterpriseOne. When installing Change Assistant, which three are required in order to use Change Assistant to download and apply ESUs?

- A. Java Runtime Environment (JRE).
- B. EnterpriseOne Development Client
- C. JDBC Driver
- D. EnterpriseOne Deployment Server
- E. Configuration Assistant

Answer: A,B,D

Question No : 13

Which JDE.INI configuration setting redirects UBE file output?

- A. DefaultPrinterOutQ
- B. UBEQueue

Oracle 1Z0-550 Exam

- C. SaveOutput
- D. OutputDirectory
- E. PrintImmediate

Answer: D

Question No : 14

Which three are configurable options during the Server Management Console installation?

- A. Server Manager Admin Password
- B. Installation Directory
- C. Console Agent Listening ports
- D. JDBC Driver location
- E. Console HTTP Port (i.e. 8999)

Answer: B,D,E

Question No : 15

In the absence of the Environment Director, you need to create a new path code, SB900, which is a copy of PD900. Which tasks are required? Select three.

- A. Create a new Environment definition in Environment Master for SB900
- B. Copy the Central Objects - PD900 database to Central Objects - SB900 via the R98403
- C. Copy the Business Data - PROD database to Business Data - SB via the R98403
- D. Create a Path Code definition in Path Code Master for SB900
- E. Copy the PD900 directory on the Deployment Server to an new SB900 directory

Answer: B,C,E

Question No : 16

Oracle 1Z0-550 Exam

How many Path Codes can you associate with an EnterpriseOne environment?

- A. 1
- B. 2
- C. 3
- D. 4
- E. Unlimited

Answer: A

Question No : 17

Peoplebooks are an integral part of the EnterpriseOne system as they provide contextual and online help for end users. Peoplebooks are installed and run through a separate J2EE application server. Once Peoplebooks have been installed to the server E1PB, what is the critical step required in order to allow searching through the many manuals possible from the index section?

- A. Run the PSOL Tomcat service as an administrator
- B. Enter the license code ffffffff
- C. Navigate as administrator to the PSOL URL <http://EIPB:8080/PSOL/htmldoc/index.htm>
- D. Generate the PSOL collections
- E. <http://elpb:8080/PSOL/htmldoc/flsearch.html> Set the EnterpriseOne Media Object Helps value to the PSOL URL

Answer: A

Question No : 18

ACME is working on setting up security for *PUBLIC, individual users, and roles. When JOE user has two roles assigned to him: Role1=APUSER sequence 10 and Role2=APADMIN sequence 15) and signs in with the *ALL role, what is the hierarchy that security records read when a user attempts to access an application or perform an action?

- A. User -> *PUBLIC -> Role1 -> Role2

Oracle 1Z0-550 Exam

- B. User -> *PUBLIC -> Role2 -> Role1
- C. User -> Role1 -> Role2-> *PUBLIC
- D. User -> Role2 -> Role1-> *PUBLIC
- E. *PUBLIC -> User -> Role1 -> Role2

Answer: C

Question No : 19

Which of the following settings must be configured AFTER creating the Business Services Server instance because it is not included as an option during the Business Services Server instance creation?

- A. Security Server
- B. Enterprise Server Name
- C. Enterprise Server Port
- D. System Datasource Name
- E. Database Type

Answer: E

Question No : 20

Sever Manager provides a unified interface where administrators can view information regarding EnterpriseOne. What are the three major functions of Server Manager?

- A. Check the EnterpriseOne Server Installed Programs
- B. Check the EnterpriseOne Server Configurations
- C. Check the EnterpriseOne Server OS Patch level
- D. Monitor the EnterpriseOne Server Process
- E. Monitor the EnterpriseOne Server Task Manager

Answer: A,B,C

Oracle 1Z0-550 Exam

Question No : 21

The EnterpriseOne Scheduler server kernel does NOT:

- A. Launch jobs at scheduled times
- B. Monitor the progress and ending states of scheduled jobs
- C. Launch batch processes in a server/environment/user combination
- D. Monitor all batch processing
- E. Dispatch functions every minute

Answer: C

Question No : 22

Which statement is FALSE regarding EnterpriseOne post-installation tasks?

- A. ESU(s) must be applied from the Deployment Server's JDEPLAN (Planner) environment.
- B. Signon Security Server can be configured from the Deployment Server's Deployment environment
- C. Client and Server packages can be built from the Deployment Server's Planner environment.
- D. Media Objects (P98MOQUE. can be configured from the Deployment Server's Deployment environment.
- E. The installation plan must be configured/installed from the Deployment Server's Planner environment.

Answer: E

Question No : 23

ACME is working on setting up security for *PUBLIC, individual users, and roles. What security type grants permission to run an application regardless of other security settings?

- A. Application
- B. Action
- C. Exit

Oracle 1Z0-550 Exam

D. Exclusive Application

E. Tab

Answer: D

Question No : 24

From time to time, EnterpriseOne software updates are released in Electronic Software Update (ESU) format to correct software issues. In order to maintain proper change control over potentially affected objects, what are the two recommended actions that could be performed prior to applying the ESU to an existing environment?

A. Run the downloaded executable and then run the impact analysis tool through the EnterpriseOne Software Updates application

B. Run the downloaded executable and then evaluate the changed objects individually through Change Assistant

C. Run the downloaded executable and then run the compare UBE R96IMPANL

D. Download and evaluate through Configuration Assistant

E. Download and evaluate through Change Assistant and the impact analysis tool

Answer: B,E

Question No : 25

When deploying a Full Package to an Enterprise Server, what defines the location of the object specifications to be used during runtime that the package deployment modifies?

A. The path code spec directory

B. The package spec directory

C. JDE.INI

D. OCM

E. The spec.ini file in the package spec directory

Answer: E
