

Oracle 1Z0-982 Exam

Volume: 80 Questions

Question: 1

When importing data into the Financials framework, which Plan Element dimension member should be selected to help keep track of the cube's data sources?

- A. OFS_Integration
- B. OFS_Calculated
- C. OFS_Systems
- D. OFS_Load

Answer: D

Explanation:

OFS_Load—Data value to import.

Question: 2

When modifying Employee and Job dimensions, what step is required to synchronize Smart Lists in Data Maps?

- A. Execute the Rollup WFP Business Rule
- B. Synchronize Data Maps
- C. Execute the Synchronize Components Business Rule
- D. Execute the Synchronize Defaults Business Rule

Answer: D

Explanation:

You must run the Synchronize Defaults business rule when entity defaults are added or existing defaults are changed. Running Synchronize Defaults pushes the updated configuration information so that form calculations are based on the updated information.

Question: 3

What is a navigation flow?

- A. Functionality that enables running multiple business rules in a predetermined sequence
- B. The application home page that users will see upon logging into the application
- C. A type of report that shows variances by geography
- D. A way to promote a plan to your supervisor

Answer: B

Explanation:

Navigation flows give application designers control over how various roles, or groups, interact with the application. The Navigation Flow Designer enables you to customize the application interface. For example, you can change the names of the cards and clusters that display on the Home page and the order in which they are displayed. You can hide cards, create new cards, and group cards into clusters. You can also customize the vertical and horizontal tabs that display on a card.

Question: 4

What Enterprise Planning and Budgeting Cloud (EPBCS) card in the Application cluster was built to navigate administrators through maintenance activities?

- A. Data Maps
- B. Overview
- C. Settings
- D. Valid Intersections
- E. Configure

Answer: C

Oracle 1Z0-982 Exam

Explanation:

The Application cluster and these cards in the Application cluster: Settings, Migration

Note: A cluster is a grouping of cards. You must first create a cluster and then you can assign cards to it.

Question: 7

In order to set up weekly planning for a continuous 18 months, which three options would need to be selected/configured when initially enabling the Financials framework?

- A. Weeks to months mapping
- B. Weekly Planning
- C. Rolling Forecast
- D. Plan Element dimension
- E. Custom Periods

Answer: A,B,C

Explanation:

For Financials or Projects: If you enabled Rolling Forecast, click Rolling Forecast to select the basis for continuous planning. Select the planning frequency (monthly or quarterly), the number of periods (12, 18, or 24 months, or 4, 6, or 8 quarters) and the number of actual periods.

For Financials, you can also select a weekly planning frequency and choose whether to plan at a weekly level for 13, 26, or 52 weeks.
