Exam C1000-074

IBM FileNet P8 V5.5.3 Deployment Professional

Version: 6.0

[Total Questions: 61]

Question No : 1

Which storage area consists of a file storage staging area on the FileNet P8 system and a separate content device?

A. File Storage Area
B. Database Storage Area
C. Fixed Storage Area
D. Operating System Storage Area

Answer: C

Explanation:

https://www.ibm.com/docs/SSNW2F_5.5.0/com.ibm.p8.ce.admin.tasks.doc/p8pcc090.htm#
:~:text=A%20fixed%20storage%20area%20consists,or%20a%20federated%20content%20
system.

Question No : 2

Which tool can be used to add a folder to an object store in order to verify that the Content Platform Engine is deployed successfully?

A. PCC
B. CMUI
C. ACCE
D. Configuration Console

Answer: A

Question No : 3

Within a FileNet P8 environment, what is an essential high availability building block?

A. Preventing single points of failure
B. Use of LTPA keys for intra-cell communications
C. One instance of Content Platform Engine
D. A group of servers where there is only one instance of each ECM component

Answer: A

Question No : 4

While performing a new Content Platform Engine deployment, one of the Configuration Manager tasks did not complete successfully.

What is the default location for the scripts and log file generated by the Configure LDAP task?

A. Content Platform Engine /nsfa/Atools\configure\profiles\Protf/e A/ame\status
B. Content Platform Engine /nsfa/Atools\configure\tmp
C. Content Platform Engine /nsfa/Atools\configure\logs
D. Content Platform Engine /nsfa/Atools\configure\profiles\Proff/e NameWogs

Answer: D

Question No : 5

A FileNet Deployment Professional wants to configure the settings that will be used by the Configuration Manager tool to install a new Content Platform Engine based on a previously configured environment. The security policies that apply to the Linux environment prohibit the use of XWindows-based GUIs, so the settings files must be reviewed directly.

What is the name of the file within the Configuration Manager profile that contains the settings for configuring the connections to an object store database used by Content Platform Engine?

A. configuredatabases.xml
B. configurejdbcos.xml
C. configureosdb.xml
D. osdbconnection.xml

Answer: A

Question No : 6

Which account can create, modify, and delete Content Platform Engine P8 domain-level resources?

A. Workflow system administrator
B. Content Platform Engine application server installation administrator
C. GCD Administrator
D. Content Platform Engine Service User

Answer: B

Question No : 7

Which type of user is required to install Content Platform Engine on AIX?

A. LDAP user with UNIX rights
B. Any user account that has the ability to log onto the server
C. root user or user with su access to root
D. Operating system user with appropriate file system permissions

Answer: D
Explanation: https://www.ibm.com/docs/en/filenet-p8-platform/5.5.x?topic=accounts-content-platform-engine-installer-account

Question No : 8

Which storage area supports content replication to heterogeneous storage devices?

A. Advanced Storage Area
B. Fixed Storage Area
C. Database Storage Area
D. File Storage Area

Answer: A

Question No : 9

In a zLinux environment, the Configuration Manager tool is installed by selecting which Content Platform Engine installer option?

A. Content Platform Engine
B. Tools
C. Content Platform Engine Client
D. .NET Clients

Answer: B

Question No : 10

A FileNet Deployment Professional wants to configure the settings that will be used by the Configuration Manager tool to install a new Content Platform Engine based on a previously configured environment. The security policies that apply to the Linux environment prohibit the use of XWindows-based GUIs, so the settings files must be reviewed directly.

What is the name of the file within the Configuration Manager profile that contains the Content Platform Engine text extraction settings?

A. deployapplication.xml
B. configurebootstrap.xml
C. configurejdbcos.xml
D. configurejdbcgcd.xml

Answer: B

Question No : 11

Which command line utility is used to view information about a configured workflow system in a Content Platform Engine environment?

A. wftool
B. petool
C. vwtool
D. cpetool

Answer: C

Question No : 12

Which URL is used to verify the Content Platform Engine server status by using the FileNet P& System Health page?

A. https://cpe_server.port/CPE/Status
B. https://cpe__server.port/FileNet/Engine
C. https://cpe_server.port/FileNet/P8Health
D. https://cpe_server.port/P8CE/Health

Answer: D

The Workflow System administration tool - vwtool - can be installed by selecting which Content Platform Engine installer option?

A. Process Engine Client
B. Tools
C. .NET Clients
D. Content Engine Client

Answer: D

The Content Platform Engine uses ODWEK to access which Fixed Content Device?

A. IBM Content Manager OnDemand
B. IBM Content Manager
C. Documentum Content Server
D. IBM FileNet Content Services

Answer: A

Explanation:

https://www.ibm.com/docs/he/SSNW2F_5.2.1/com.ibm.p8.cfs.admin.doc/cfsod004.htm#:~:text=Content%20Platform%20Engine%20uses%20ODWEK%20to%20access%20the%20Content%20Manager%20OnDemand%20repositories.

What happens if the GCD is not available upon startup of the Content Platform Engine?

A. The Content Platform Engine will use a cached in memory copy of the GCD and is fully functional.
B. The Content Platform Engine does not need the GCD, cached in memory or local file based copy.
C. The Content Platform Engine will use a local file based copy and can process requests that do not update the GCD.

D. The Content Platform Engine will use a local file based copy and is fully functional.

Answer: C

Question No : 16

What should be done immediately after a Content Platform Engine base install?

A. Install any fix packs, then check the logs.
B. Do a full offline backup of the filesystem.
C. Check the installation logs for any errors, resolve any errors before moving on.
D. Start the server and make sure it works as expected.

Answer: C

Question No : 17

While performing a new Content Platform Engine deployment, one of the Configuration Manager tasks did not complete successfully.

Which file provides details why the Deploy Application task did not complete successfully?

A. deployapplication.failed
B. deployapplication.bad
C. deployapplication.error
D. deployapplication.unsuccessful

Answer: C

Question No : 18

What Java component needs to be installed prior to running the FileNet P8 Content Platform Engine installer?

A. OpenJava JDK
B. IBM Java JRE
C. IBM Java SDK
D. No additional JDK/JRE is required.

Answer: A
