Practice Exam Questions

IBM | Professional Certification

C1000-088

IBM Spectrum
Storage Solution Architect

Total Question: 60 QAs

Question No: 1

Which IBM AI solution provides an extensible platform with exabyte scale data ingest, data visualization data activation, and business-oriented data mapping across a customer's enterprise?

A. IBM Spectrum Discover

B. IBM Cloud Object Storage

C. IBM Spectrum Copy Data Management

D. IBM Spectrum Virtualize

Answer: A

Question No: 2

How can governance with IBM Spectrum Discover help to mitigate risk?

A. manages immutable tags for classification retention

B. obfuscation of personally identifiable information (Pit) in queries from certain sources

C. automatically identify suspicious data access patterns

D. automatically identify certain kinds of personally identifiable information (PII)

Answer: C

Question No: 3

Which product allows a customer to review performance data over the 5 year life of storage systems in their environment?

A. IBM Spectrum Control

B. IBM Disk Magic

C. IBM Storage Insights Pro

D. IBM Spectrum Virtualize

Answer: C

Question No: 4

In which two offerings can IBM Spectrum Virtualize software be deployed?

A. SVC Appliance

B. Oracle Cloud

C. IBM Cloud

D. IBM POWER

E. IBM Mainframe

Answer: B,E

Question No: 5

How can IBM Spectrum Scale achieve Information Lifecycle Management (ILM) using IBM Spectrum Protect for Space Management?

A. using cluster export services

B. using the IBM Spectrum Protect API

C. using an internal storage pool

D. using an external storage pool

Answer: D

Question No: 6

IBM Storage Suite for Cloud Paks supports which connector between persistent storage and Kubernetes?

A. Container Storage Interface

B. Persistent Storage Interface

C. Object Storage Interface

D. Block Storage Interface

Answer: C

Question No: 7

Artificial Intelligence is used in which storage solution?

A. IBM Spectrum Storage Management

B. IBM Spectrum Scale

C. IBM Spectrum Archive

D. IBM Storage Insights Pro

Answer: A

Question No: 8

Which IBM storage product allows a customer to have an end-to-end data path view of their entire storage environment?

A. IBM Spectrum Control

B. IBM Spectrum Discover

C. IBM Spectrum Scale

D. IBM Spectrum Conductor

Answer: A

Question No: 9

Which storage solution includes a dynamic data migration function to move data from one storage system to another while still maintaining access to that data?

A. IBM Spectrum Control

B. IBM Spectrum Conductor with Spark

C. IBM Spectrum Virtualize

D. IBM Spectrum Protect Plus

Answer: C

Question No: 10

IBM Storage Insights monitors which three items?

A. Best practices

B. Capacity

C. Performance

D. Remote cod© load

E. Replication

Snapshot

Answer: A,B,C

Question No: 11

What is a performance modeling tool which can be used with various storage systems in the IBM Spectrum Virtualize family?

A. IBM Storage Tier Advisor Tool

B. IBM Storage Modeller (StorM)

C. IBM Client Storage Assessment

D. IBM Storage Estimator

Answer: A

Question No: 12

A customer with a heterogeneous storage environment is struggling to products to separate public cloud services.

Which product could simplify this for the customer?

A. IBM Storage Insights

B. IBM Spectrum Scale Transparent Cloud Tiering

C. IBM Spectrum Virtualize

D. IBM Spectrum Control

Answer: A

Question No: 13

What is an indication of a possible ransomware attack in an IBM Spectrum Protect environment?

A. Data ingest rate decreases

B. Data is changed to read only

C. Data deduplication ratio increases

D. Data deduplication ratio reduces

Answer: B

Question No: 14

Which feature in IBM Spectrum Control ensures that users only have access to the features and functions necessary?

A. User Defined Ability

B. Root User Control

C. Function Specific Authorization

D. Role-based Access Control

Answer: D

Question No: 15

Which storage product offers both server-side and client-side in-line deduplication?

A. IBM Spectrum Protect

B. IBM Spectrum Scale Container Storage Interface

C. IBM Spectrum Archive

D. IBM Copy Services Manager

Answer: A

Question No: 16

When designing an IBM Elastic Storage Server (ESS) Export Services (CES) be run?

A. on all nodes in the ESS cluster

B. on the ESS Management Server (EMS)

C. in separate VMs on the RAID nodes

D. on specially configured protocol nodes

Answer: D

Question No: 17

What is a storage pool disaster protection strategy in an IBM Spectrum Protect single-site solution?

A. tier the data to a cloud pool

B. back up to a copy pool and send tapes offsite

C. migrate the data to the tape library

D. use node replication to copy data to local pool

Answer: D

Question No: 18

What are the two licensing options offered through IBM's Storage Suite for IBM Cloud Paks?

A. Standard Edition

B. Capacity Edition

C. Data Management Edition

D. Advanced Edition

E. Entry Edition

Answer: A,B

Question No: 19

Kubernetes Backup Support protects only persistent storage that was allocated by a storage plug-in that supports which feature?

A. Storage Cloud Interface

B. Storage Container Interface

C. Container Storage Interface

D. Container Kubernetes Interface

Answer: C

Question No: 20

What is the SecureSlice method of data-at-rest encryption that IBM Cloud Object Storage uses?

A. 256-bit AES encryption

B. all-or-nothing-transform

C. synthetic-grouping

D. server-side proxy

Answer: A
