Total Question: 60 QAs

Question No: 1

Which statement is true about IBM Event Streams?

- A. A hierarchical Pub/Sub topic architecture is available
- B. All servers must be located in the same data center
- C. Persistent storage is enabled by default
- D. By default the consumers offset is automatically committed in the background

Answer: A

Question No: 2

What does Agile Integration, as defined by IBM, relate to?

- A. Unlocking enterprise data securely using integration powered APIs
- B. Implementing event driven architectures for real time integration
- C. Adopting microservices based development for better agility and scalability
- D. Rethinking the approach to integration that is based on people, architecture, and technology

Answer: B

Question No: 3

The API Integration pattern is used to enable which use case?

- A. Synchronous point-to-point access to services in closed heritage systems or heterogeneous backends
- B. Synchronous access to fine-grained services across various backends
- C. Asynchronous many-to-many coordination of services across multicloud and on-premises contexts
- D. Asynchronous point-to-point access to services in closed heritage systems or heterogeneous backends

Answer: D

Question No: 4

Which active-standby pair of queue managers uses a shared networked file system?

- A. Double resilient queue manager
- B. Replicated data queue manager
- C. Integrated HA queue manager
- D. Multi-instance queue manager

Answer: D

Question No: 5

Click the diagram that shows a decentralized IBM MQ Containerized Architecture:

Answer:

Question No: 6

Which mechanism is available in IBM Event Streams to help with disaster recovery by replicating topic configuration, messages of a topic, and metadata from an origin cluster to a destination cluster?

- A. Geo-configuration
- B. Geo-datasync
- C. Geo-recovery
- D. Geo-replication

Answer: D

Question No: 7

What is the required storage class and access mode settings for deployment of high speed transfer integration capability?

- A. Type: File System and Access mode: Read-Write-Many
- B. Type: File System and Access mode: Read-Only-Many
- C. Type: Block System and Access mode: Read-Write-Once
- D. Type: Block and Access mode: Read-Write-Many

Answer: C

Question No: 8

A decentralized ownership approach in modern agile integration methodology leads to which benefit?

- A. Accelerated development agility
- B. Operational agility with dynamic scalability and inherent resilience
- C. Installation agility that enables auto deployment
- D. Business agility with a guaranteed improved time to market

Answer: B

Question No: 9

When deploying API Connect on an OpenShift cluster, what are the minimum number of nodes required for high availability for the platform?

- A. 2 Master Nodes and 2 Worker Nodes
- B. 1 Master Node and 2 Worker Nodes
- C. 1 Master Node and 3 Worker Nodes
- D. 3 Master Nodes and 3 Worker Nodes

Answer: C

Question No: 10

Which Command Line interface tool provides an analyze method which validates resources configuration and print validation messages?

- A. calicoctl
- B. oc
- C. cloudctl
- D. istioctl

Answer: A

Question No: 11

Which integration capability must be recovered prior to recovering an Aspera instance?

- A. DataPower Gateway
- B. MQ
- C. API Connect
- D. Event Streams

Answer: A

Question No: 12

An OpenShift v4 control plane node has failed. Which is the recommended method to restore the cluster?

- A. Restore all cluster master hosts from a previous backup
- B. Remove the member from the etcd cluster and then add the member back to the etcd cluster
- C. Remove the member from the API server cluster and then add the member back to the API server cluster
- D. Run the master-restore script provided as part of OpenShift 4

Answer: D

Question No: 13

What is a significant challenge that is unique to hybrid messaging?

- A. Iterate quickly on the cloud and interact easily with enterprise systems of records
- B. Build a scalable and high-throughput enterprise messaging backbone to support applications on the cloud
- C. Synchronous connection and distribution of events between cloud and on-premises systems
- D. Monitoring of privileged access to sensitive data and integrity of sensitive data in transit and at rest can be done only within the enterprise

Answer: D

Question No: 14

Which two scenarios are true for a customer who buys licenses of Cloud Pak for Integration (CP4I)?

- A. Entitlements will be consumed when CP4I features like tracing, common services, and Platform Navigator are used
- B. Customer can use some of these entitlements for deploying WebSphere Application Server
- C. These entitlements can be used for deploying any capability that comes as part of CP4I
- D. Customer will need to purchase equivalent entitlements to Red Hat OpenShift Container Platform
- E. Customer can use these entitlements to run standalone version of components bundled in CP4I

Answer: A,C

Question No: 15

What is the function of Kibana in the Cloud Pak For Integration logging service?

- A. Collate, correlate, and interpret log data
- B. Capture, collect, and forward log data
- C. Index, search, and store log data
- D. Query, discover, and visualize log data

Answer: C

Question No: 16

Application owned asynchronous capabilities, like messaging and events, must exhibit which features to align to agile integration paradigm?

- A. Simple deployment topology for high availability configuration
- B. Ability to convert message to events and vice versa
- C. Self-provisioning and self-administration capability to allow development agility
- D. Common collection of logs across several instances for rapid administration

Answer: A

Question No: 17
