### **IBM Maximo Manage v8.0 Implementation**

**Version: 6.0**

**[ Total Questions: 64 ]**

**Question No : 1**

When creating a labor record, what must be associated with it?

- A. User Record
- B. Person Record
- C. Crew
- D. Supervisor

**Answer: B**

**Explanation:** When you create a labor record in IBM Maximo Manage v8.0, you enable a person to report time against a work request<sup>1</sup>. Before you create a labor record, you must create a corresponding person record<sup>1</sup>. A person record is defined at the System level and when a person works across multiple organizations, they need multiple Labor records linked to the same Person record<sup>2</sup>.

**Question No : 2**

Calendars can be associated with which three record types?

- A. Items
- B. Locations
- C. Job Plan
- D. Person
- E. Contracts
- F. Assets

**Answer: B,D,F**

**Question No : 3**

What are the three default classes of a Ticket?

- A. Problem
- B. Activity
- C. Service Request
- D. Change
- E. Incident

F. Release

**Answer: A,C,E**

**Explanation:** The three default classes of a Ticket in IBM Maximo Manage are Problem, Service Request and Incident.

**Question No : 4**

Which two records can be included as a contract line item on a Lease/Rental Contract?

- A. Non-Rotating Asset
- B. Rotating item
- C. Asset
- D. Tool
- E. Non-Rotating item

**Answer: B,C**

**Explanation:** In IBM Maximo Manage, two records that can be included as a contract line item on a Lease/Rental Contract are a Rotating item and an Asset.

**Question No : 5**

What is a core application in Maximo Manage?

- A. Maintenance Version Control
- B. Customer Billing
- C. Permit to Work
- D. Graphical Scheduling

**Answer: C**

**Explanation:** The Permit to Work application is a core application in IBM Maximo Manage v8.0. This application allows users to manage work permits, ensure compliance with safety regulations, and ensure that work is authorized before it is started. Other core applications in Maximo Manage include Work Order Tracking, Asset Management, and Inventory Management.

**Question No : 6**

To what type of objects can a Service Level Agreement be applied?

- A. only the objects based on the Work Order or Ticket Classes, and Assets, Locations and Configuration Items
- B. only the Main Object that are Internal
- C. only the objects based on the Work Order or Ticket Classes
- D. any Main Object

**Answer: A**

**Explanation:** A Service Level Agreement can be applied only to objects based on the Work Order or Ticket Classes, and Assets, Locations and Configuration Items.

**Question No : 7**

What are three integration End Points Handlers available in Maximo Manage?

- A. XMLFILE
- B. XLS
- C. EMAIL
- D. WSDL
- E. FLATFILE
- F. KAFKA

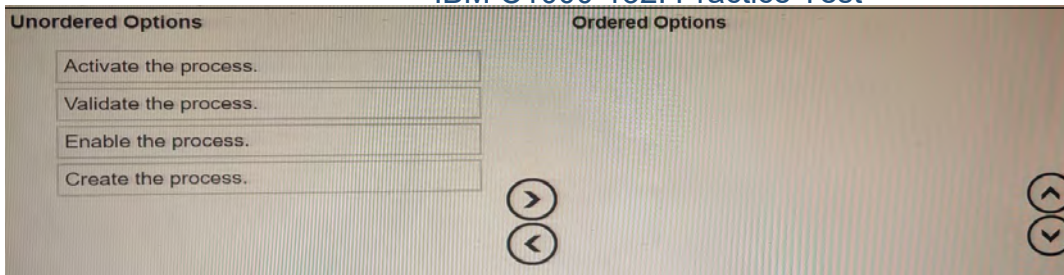

**Answer: A,C,E**

**Explanation:** Three integration End Points Handlers available in Maximo Manage are XMLFILE, EMAIL and FLATFILE.

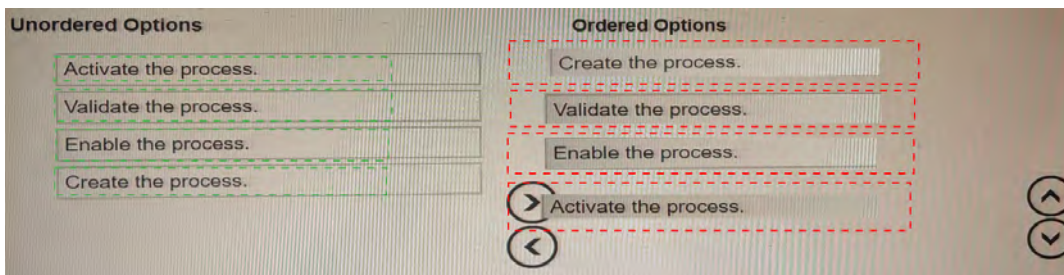

**Question No : 8 DRAG DROP**

Select all that apply

What is the appropriate order of phases in order to create a workflow process?

### Answer:

**Explanation:** The appropriate order of phases in order to create a workflow process in IBM Maximo Manage is:

- ✍ Create the process: This involves designing the workflow process using the Workflow Designer application, including creating the activities, transitions, and conditions that make up the process.
- ✍ Validate the process: This involves ensuring that the process has been designed correctly and meets the desired requirements. This can be done by testing the process and making any necessary adjustments.
- ✍ Enable the process: This involves making the process available for use in the system by enabling it in the Workflow Designer application.
- ✍ Activate the process: This involves activating the process in the Workflow Administration application so that it is ready for use by the system.

### Question No : 9

Which statement is true regarding Master Preventative Maintenance (PM) records?

- A. Associated PM records can only be created for a rotating item's asset.
- B. Associated PM records can be created for a Master PM which does not have an item
- C. Associated PM records are temporary and expire after 90 days.
- D. Associated PM records can only be created for a rotating item's location.

### Answer: B

**Explanation:** Regarding Master Preventative Maintenance (PM) records in IBM Maximo Manage, associated PM records can be created for a Master PM which does not have an item.

**Question No : 10**

When viewing a Storeroom in the Manage Inventory Work Center, what are three record sets (tabs) that can be viewed?

- A. Child Storerooms
- B. Year to Date Figures
- C. Counts
- D. Vendors
- E. Reconcile
- F. Balances

**Answer: A,C,F**

**Explanation:** In IBM Maximo Manage v8.0 implementation, when viewing a Storeroom in the Manage Inventory Work Center, the three record sets (tabs) that can be viewed are Child Storerooms, Counts, and Balances. These record sets provide different views of the inventory and allow users to manage and track inventory levels and movements.

**Question No : 11**

In which two places can Service Request Categories be created for use in the Service Request Work Center?

- A. Classifications Application
- B. Administration Work Center
- C. Business Analysis Work Cen
- D. Service Desk Application
- E. Service Catalog Application

**Answer: B,E**

**Explanation:** In IBM Maximo Manage, Service Request Categories can be created for use in the Service Request Work Center in two places - the Administration Work Center and the Service Catalog Application.

**Question No : 12**

In what Maximo Manage application are the specifications of an asset for calibration entered?

- A. Classifications
- B. Asset
- C. Data Sheet Template
- D. Improvements

**Answer: C**

**Explanation:** In IBM Maximo Manage, the specifications of an asset for calibration are entered in the Data Sheet Template application.

**Question No : 13**

What is a licensing method used to obtain the Maximo Asset Suite?

- A. Cloud based license
- B. Feature based license
- C. Monthly license
- D. User credits license

**Answer: A**

**Explanation:** One licensing method used to obtain the Maximo Asset Suite is a Cloud based license.

**Question No : 14**

Which limit is used to trigger a Condition Monitoring Point with a GAUGE Meter Type?

- A. Meter Limit

- B. Warning Limit
- C. Measurement Limit
- D. Action Limit -

**Answer: D**

**Explanation:** In IBM Maximo Manage, the Action Limit is used to trigger a Condition Monitoring Point with a GAUGE Meter Type.

#### Question No : 15

In the Item Master application, with what can a Kit Item be associated?

- A. Non Rotating item
- B. Lot item
- C. Condition enabled item
- D. Service item

**Answer: A**

**Explanation:** a Kit Item can be associated with A. Non Rotating item. When you create a kit record for an item in the Item Master application, you can define the structure of the kit using the Item Assembly Structure tab<sup>1</sup>. When adding a kit to a storeroom, if the component items do not exist in the storeroom, inventory records are created for these items<sup>1</sup>. However, you cannot create item kits that contain condition-enabled, rotating or lotted items<sup>1</sup>.

#### Question No : 16

If additional attributes are added to the Work View, how can they be automatically updated from changes made to a corresponding Ticket and Work Order fields?

- A. by modifying the existing Crossover Domains TKT2WV or W02WV
- B. by adding a Crossover Domain to TICKETID or WONUM
- C. by updating the existing Cron Task UpdateWorkView that has two instances TKT2WV and W02WV that use the Crossover Domains of the same name
- D. by modifying the existing Object Launch Point automation script UpdateWV

**Answer: A**

**Explanation:** In IBM Maximo Manage v8.0 implementation, if you add additional attributes to the Work View and want them to be automatically updated from changes made to

corresponding Ticket and Work Order fields, you can modify the existing Crossover Domains TKT2WV or W02WV. Crossover Domains define a mapping between fields on two different objects, allowing data to be synchronized between them.

**Question No : 17**

At which data storage level are locations, assets and storerooms defined?

- A. Set
- B. Site
- C. System
- D. Organization

**Answer: B**

**Explanation:** Locations, assets and storerooms are defined at the Site level in IBM Maximo Manage.

**Question No : 18**

Which two automation script launch points can be triggered directly by a workflow?

- A. Object
- B. Custom Condition
- C. Attribute - '
- D. Action
- E. Integration

**Answer: B,D**

**Explanation:** two automation script launch points that can be triggered directly by a workflow are B. Custom Condition and D. Action. An action launch point associates a script with an action and executes when the specified action occurs<sup>1</sup>. A custom condition launch point associates a script with a condition and executes when the specified condition is evaluated<sup>2</sup>.
