SAP Certified Application Associate - SAP HANA 2.0 SPS06

Version: 3.0

[Total Questions: 80]

Question No : 1

Which replication modes keep the primary system waiting until a timeout is exceeded when the secondary system is not available? Note: There are 2 correct answers to this question.

- A. ASYNC
- B. SYNCMEM
- C. FULL SYNC
- D. SYNC

Answer: B,D

Question No : 2

Which actions can you perform using the SAP HANA platform lifecycle management web user interface? Note: There are 2 correct answers to this question.

- A. Configure the system landscape directory registration.
- B. Manage the full system information dumps.
- C. Update the SAP HANA database system
- D. Stop and start the SAP HANA database system

Answer: A,C

Question No : 3 CORRECT TEXT

Which actions take place during a database migration option (DMO) procedure when performing an in-place migration? Note: There are 2 correct answers to this question.

- A One table is migrated per R3load pair
- B. De-pooling of tables is done during the procedure.
- C. TABART is considered for the creation of R3load control files.
- D. SAPup decides which tables to split.

Answer: A, D

Question No : 4

Which feature do you use to dynamically manage SAP HANA database workloads per client session?

- A. Workload classes
- B. Admission control
- C. Parallel execution of SQL statements
- D. Non-Uniform Memory Access (NUMA)

Answer: A

Question No : 5

Which prerequisites must be fulfilled before adding hosts to an SAP HANA scale-out system? Note: There are 2 correct answers to this question.

- A. The SAP HANA system installation is on a shared file system
- B. The additional host is placed in a different data center
- C. The SAP HANA database server IS shut down.
- D. The host has access to the Installation directories

Answer: A,D

Question No : 6

Which feature do you configure to prevent the whole SAP HANA database system from reaching physical processing limits?

- A. Workload classes
- B. Capture and replay
- C. Performance trace
- D. Admission control

Answer: D

Question No : 7

How are hosts assigned to the shared storage in the SAP HANA scale-out system? Note: There are 2 correct answers to this question.

- A. The master node is assigned to its own data volume.

- B. The master node is assigned to all log volumes
- C. The worker nodes are assigned to their own log volumes
- D. The standby node is assigned to the worker data volume.

Answer: A,D

Question No : 8

Which file systems are supported for the data and log volumes of the SAP HANA 2.0 database system? Note: There are 2 correct answers to this question.

- A. Btrfs
- B. OCFS2
- C. GPFS
- D. xfs

Answer: C,D

Question No : 9

You are running an SAP HANA database in log mode "normal"

Under what circumstances does the database automatically execute a regular log backup?

Note: There are 2 correct answers to this question.

- A. When the log segment is full
- B. When a commit occurs
- C. When the time threshold is exceeded
- D. When the log buffer is full

Answer: A,C

Question No : 10

Which prerequisites have to be fulfilled before you reset a database migration option (DMO) procedure? Note: There are 2 correct answers to this question.

- A. cleanup has already been triggered.
- B. The SUM folder needs to exist

- C. The DMO process hasn't reached downtime yet
- D. The source database is up and running

Answer: B,D

Question No : 11

What are the merge methods that are triggered by the SAP HANA system? Note: There are 2 correct answers to this question.

- A. Smart
- B. Critical
- C. Forced
- D. Auto

Answer: B,D

Question No : 12

What is a characteristic of the delta data shipping operation mode in SAP HANA system replication?

- A. It takes place in addition to continuous log replay.
- B. It takes place in addition to continuous log shipping
- C. It takes place every 5 minutes
- D. It takes place with continuous read-only access to the secondary system

Answer: B

Question No : 13

You are planning an SAP S/4HANA scale-out system

What are the minimal size requirements for CPU and memory?

- A. RAM: $\geq 4\text{TB}$, CPU: ≥ 8
- B. RAM: $\geq 6\text{TB}$, CPU: ≥ 8
- C. RAM: $\geq 8\text{TB}$, CPU: ≥ 12
- D. RAM: $\geq 6\text{TB}$, CPU: ≥ 12

Answer: B

Question No : 14

What is the recommended size for the log volume file system for a 512 GB SAP HANA database system?

- A. 614 GB
- B. 256 GB
- C. 512 GB
- D. 427 GB

Answer: B

Question No : 15

Which file system locations do need to specify when installing the SAP HANA multi-host database system using the default settings?

Note: There are 2 correct answers to this question.

- A. /hana/shared
- B. /usr/sap/hostctrl >/
- C. /hana/log/<SID>
- D. /usr/sap/<SID>

Answer: A,C

Question No : 16

You are checking and monitoring SAP HANA system replication

Which status indicates a temporary connection loss of the secondary system?

- A. Unknown
- B. Error
- C. Initializing
- D. Syncing

Answer: D

Question No : 17

During the delta merge process, to which memory areas is data inserted? Note: There are 2 correct answers to this question.

- A. Main 2
- B. Main 1
- C. Delta 2
- D. Delta 1

Answer: A,C

Question No : 18

You want to perform the database migration option (DMO) procedure.

Which components have to be updated if they are not on the right version level?

Note: There are 2 correct answers to this question.

- A. SAP Host Agent
- B. SPAM/SAINT
- C. ST-PI
- D. ABAP Kernel

Answer: A,B

Question No : 19

Which tools are integrated into the SAP HANA cockpit? Note: There are 3 correct answers to this question

- A. SQL Analyzer
- B. HDBAdmin
- C. HANASitter
- D. SQL Console
- E. Database Explorer

Answer: A,D,E

Question No : 20

Which types of backups can you use to copy an SAP HANA tenant database? Note: There are 2 correct answers to this question.

- A. Full database backup
- B. Data snapshot
- C. Delta database backup
- D. Fallback snapshot

Answer: A,B

Question No : 21

What can you check with the SAP HANA hardware and cloud measurement tools (HCMT)? Note: There are 2 correct answers to this question.

- A. Cloud connector status
- B. Linux kernel information
- C. NUMA memory bandwidth test
- D. CPU states

Answer: C,D

Question No : 22

Which table holds the data used for the dynamic management of partitions and locations?

- A. TABLE GROUP
- B. UPDATE LANDSCAPE CONFIGURATION
- C. TABLE PLACEMENT
- D. EFFECTIVE TABLE PLACEMENT

Answer: C

Question No : 23

Which backup types can you schedule using the backup scheduler in the SAP HANA cockpit? Note: There are 2 correct answers to this question.

- A. Delta backup
- B. Full backup
- C. Fallback snapshot
- D. Data snapshot

Answer: A,B

Question No : 24

Which hardware KPIs do you need to size before performing a tailored data center integration (TDI) installation for a productive SAP HANA database system?

Note: There are 2 correct answers to this question.

- A. Network bandwidth for the storage zone
- B. Total disk space required for the log volume
- C. Persistent memory (PMEM) required for backups
- D. DRAM required for the static data memory area

Answer: B,D

Question No : 25

How can the system database administrator disable tenant database functionalities? Note: There are 2 correct answers to this question.

- A. Using the resident hdblcsm tool
- B. Using the Manage Restricted Features app
- C. Using the Manage Database Configuration app
- D. Using the hdbuserstore tool

Answer: B,D

Question No : 26

Which system privilege do you need to redistribute tables across the hosts in a scale-out system?
