

Question #:1

As part of a Dell EMC VxBlock System implementation, you need to validate that the Vision Intelligent Operations has completed the discovery Which Vision VM is used for the https://< fqdn > 8443/fm/systems address?

- A. Data Center Network Manager
- B. Multi-System Pre-positioning
- C. Multi-System Management
- D. Core

Answer: A

Question #:2

Which document is used to handoff a Dell EMC VxBlock System from the Deployment and Implementation team to Customer Care?

- A. Configuration Reference Guide
- B. Logical Configuration Survey
- C. Vision RCM Compliance Report
- D. Deployment Audit Checklist

Answer: A

Question #:3

You are preparing for a new VxBlock System deployment and implementation service. Which activity is a joint responsibility of the customer and Dell EMC or Dell EMC Partner?

- A. VxBlock System implementation test planning
- B. Documentation finalization
- C. Customer configuration design review
- D. Logical configuration information gathering

Answer: A

Question #:4

A Dell EMC VxBlock System 740 administrator has been asked to add a new host to an existing cluster of four hosts shared by a single Masking View. If the new host has already been presented with a boot LUN through another Masking View, which group needs to be edited to accomplish this task?

- A. Cascaded Initiator Group
- B. Disk Group
- C. Port Group
- D. Storage Group

Answer: A

Question #:5

Which document is provided by the Dell EMC VxBlock Physical Build team to the Logical Build team to associate the end-to-end switches and cable types with the correct color coding?

- A. Logical Configuration Survey
- B. Cabinet and Power Worksheet
- C. Port Map Workbook
- D. Rack Elevation in the Solutions Abstract

Answer: A

Question #:6

Which operation is performed during the Physical Build process of a Dell EMC VxBlock System?

- A. Configure the AMP
- B. Install the UCS chassis
- C. Install Vision Intelligent Operations
- D. Configure the UCS Fabric Interconnects

Answer: C

Question #:7

Based on performance best practices, what is the maximum number of hosts that should be connected to each FC port of a Dell EMC VxBlock System 540?

- A. 16
- B. 32
- C. 64
- D. 128

Answer: B

Question #:8

You are planning to deploy a Dell EMC VxBlock System solution Which customer information can be collected in the pre-deployment Site Survey?

- A. Logical IP information Data cabling and connectivity Cabinet layout
- B. VxBlock power cable layout Power, cooling, and weight Data cabling and connectivity Cabinet layout
- C. Physical facility information Power, cooling, and weight Data cabling and connectivity Cabinet layout
- D. Physical facility information VxBlock power cable layout Cabinet layout

Answer: D

Question #:9

In a Dell EMC VxBlock System, which protocol is used between the Fabric Interconnects and the Nexus switches in a segregated network for storage access?

- A. FCoE
- B. IP
- C. iSCSI
- D. FC

Answer: B

Question #:10

Which task can be successfully completed after creating a share for remote mounting from a Dell EMC VNX Data Mover?

- A. Microsoft Windows server mounts the share using the CIFS protocol
- B. ESX host mounts the share using the CIFS protocol and accesses the files
