

Juniper JNO-210 Exam

Volume: 65 Questions

Question: 1

What are two roles of the NorthStar? (Choose two)

- A. to push endpoint device images to customer edge devices
- B. to distribute routing updates to network devices
- C. to optimize paths through the network based on traffic statistics
- D. to calculate paths through the network based on topology information

Answer: C,D

Question: 2

You have a data center switching fabric that is comprised of Junos switches. You are using an API-based SDN implementation to manage the devices.

In this scenario, which statement is true?

- A. The control plane is managed on the SDN controller
- B. The control and forwarding planes are separated
- C. The SDN controller makes routing and forwarding decisions
- D. The control plane remains on the individual devices

Answer: B

Question: 3

Which two Juniper NFV products would be used to provide IPsec VPN termination between a public cloud provider and your network? (Choose two)

- A. vQFX
- B. vSRX
- C. vMX

Juniper JNO-210 Exam

D. vRR

Answer: B,C

Question: 4

Which two statements are true regarding a zero trust network security model? (Choose two)

- A. It assumes that security threat management cannot be centralized
- B. It assumes that security threats can originate inside the network
- C. It assumes that security threats can originate outside of the network
- D. It assumes that security devices cannot detect and prevent network threats

Answer: B,C

Question: 5

What are two characteristics that make VXLAN preferred over other overlay protocol encapsulation methods? (Choose two)

- A. VXLANs have a theoretical maximum of 16,000,000 VNIs
- B. VXLAN is an open standard protocol
- C. VXLAN provides easy integration into existing STP implementations
- D. VXLANs forward BUM traffic into the underlay on an as needed basis

Answer: A,B

Question: 6

Juniper Networks SD-WAN feature is part of which product offering?

- A. NorthStar
- B. Cloud CPE solution
- C. Sky ATP

Juniper JNO-210 Exam

D. Contrail Cloud

Answer: B

Question: 7

What are two virtualized components of a vMX? (Choose two)

A. VFP

B. vNIC

C. vSwitch

D. VCP

Answer: A,D

Question: 8

A customer wants to deploy a complicated service and needs complete control of all applications, servers, and server operating systems.

Which type of service should the customer purchase in this scenario?

A. FWaaS

B. SaaS

C. PaaS

D. IaaS

Answer: D

Question: 9

What are two protocols NorthStar uses to provision LSPs? (Choose two)

A. IF-MAP

B. XMPP

C. PCEP

Juniper JNO-210 Exam

D. NETCONF

Answer: C,D

Question: 10

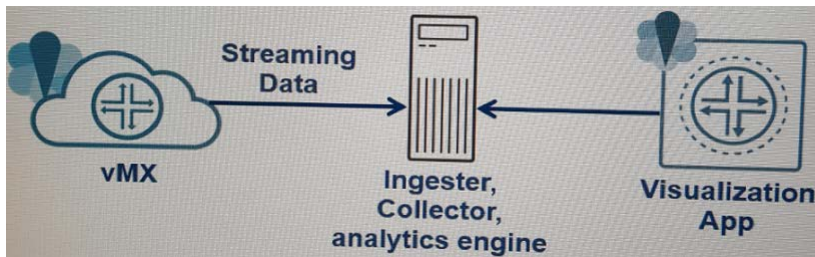

Which statement is correct about CSO?

- A. CSO is a complete orchestration system and can replace OpenStack
- B. CSO has a gateway component and can be used to connect data centers
- C. CSO can be used to establish and monitor LSPs in a service provider network
- D. CSO can be used to manage VNFs at service provider's customer site

Answer: D

Question: 11

Click the Exhibit button.

Which type of cloud system is shown in the exhibit?

- A. cloud storage
- B. cloud management
- C. cloud telemetry
- D. cloud security

Answer: C

Question: 12

Which two statements are true about a public cloud? (Choose two)

Juniper JNO-210 Exam

- A. Resources are closed to the public
- B. Resources are hosted within your organization
- C. Resources are shared with other entities
- D. Resources are accessed through a public network

Answer: C,D

Question: 13

The NorthStar Controller has identified a shared risk in the network. Which statement is true in this scenario?

- A. Multiple LSPs cross the same path
- B. A customer's VNF is at risk of failing
- C. The NorthStar Controller is detecting database errors
- D. A PE device hosts multiple edge customers

Answer: A

Question: 14

What is an SDN solution?

- A. Sky ATP
- B. AppFormix
- C. OpenFlow
- D. Cyphort

Answer: C

Question: 15

What are two core projects in OpenStack? (Choose two)
