Exam JN0-213

Cloud-Associate (JNCIA-Cloud)

Version: 2.0

[Total Questions: 123]

Question No : 1

A customer wants to provide advanced Layer 4 through Layer 7 security services for a VMware NSX microsegementation deployment.

Which platform would you recommend using in this scenario?

A. ACX Series
B. vMX Series
C. vSRX Series
D. QFX Series

Answer: C

Question No : 2

Which statement is true about the OpenConfig data model?

A. It supports YANG
B. It provides UDP-based transport
C. It is embedded in all devices that run the Junos OS
D. It uses MySQL as the default database structure

Answer: A

Question No : 3

Which cloud CPE component manages the end-to-end path from the CPE to the central office or to another CPE?

A. service orchestration
B. infrastructure orchestration
C. physica telco cloud infrastructure
D. virtual network functions

Answer: A

Question No : 4

According to the juniper network, what is the recommended external routing protocol for the underlay network?

A. IS-IS
B. EGP
C. OSPF
D. BGP

Answer: D

Question No : 5

What are two characteristics of Policy Enforcer? (Choose two)

A. Policy Enforcer has its own standalone GUI
B. Policy Enforcer consolidated threat information from multiple sources
C. Policy Enforcer provides telemetry data for a collector device
D. Policy Enforcer is integrated with Security Director

Answer: B,D

Question No : 6

Which statement is true about Junos Space security director?

A. Security director is a standalone management platform
B. Security director is a centralized security policy manager
C. Security director is an SDN controller
D. Security director is a network orchestrator

Answer: B

Question No : 7

Which two statements are correct about the NFV framework?(Choose two)

A. The NFV framework is defined by ANSI
B. The NFV framework is defined by ETSI
C. The NFV framework enables horizontally scalable deployments of

services
D. A spine and leaf implementation is an example of the NFV framework

Answer: B,C

Question No : 8

AppFormix alarm notification are sent to an HTTP server using which format?

A. plain text
B. XML
C. CSV
D. JSON

Answer: D

Question No : 9

Juniper Networks supports which two alternatives to layer 2 loop prevention protocols, such as STP, in an underlay network? (Choose two)

A. MC-LAG
B. BGPC. LACP
C. TRILL

Answer: A,C

Question No : 10

Which CSO component enables ISPs to set up and manage the virtual network and customers?

A. Service and Infrastructure Monitor
B. Designer Tools
C. Administration Portal
D. Customer Portal

Answer: C

Question No : 11

From where does AppFormix gather performance metrics in a network?

A. from RPM probes sent across the network
B. from statistics NFVs instantiated in the data path
C. from an agent on the host or system
D. from a REST API connection

Answer: C

Question No : 12

A company requests increased bandwidth during two specific periods each year.

Which solution will accomplish the desired result?

A. NorthStar planner
B. NorthStar bandwidth calendaring
C. NorthStar maintenance Mode
D. Centralized Path computation

Answer: A

Question No : 13

Which statement describes AppFormix?

A. AppFormix is a high-performance virtual device that secures virtualized and cloud environments
B. AppFormix is the SDN automation platform for OpenStack Iaas
C. AppFormix is responsible for monitoring, Analytics and intent-driven infrastructure optimization
D. AppFormix is virtualized full-featured, carrier-grade ideal for NFV environments

Answer: C

Question No : 14

What are two roles of sandboxing in Sky ATP? (choose two)

A. To test the operation of security rules
B. To analyze the behavior of potential security threats
C. To validate the operation of third-party components
D. To store infected files for further analysis

Answer: B,D

Question No : 15

What provisions new switches or routers in your network automatically, with no manual intervention?

A. PCEP
B. ZTP
C. BGP
D. RSVP

Answer: B

Question No : 16

What are two characteristics of cloud computing? (Choose two.)

A. Services are provisioned using automation.
B. Services are provisioned by the customer

Answer: A,B

Question No : 17

Which cloud architecture provides developers a framework on which to develop and customize applications?

A. DBaaS
B. PaaS
C. IaaS

D. FWaaS

Answer: B

Question No : 18

What are two protocols used by NorthStar Controller to discover the network topology?(Choose two)

A. SNMP
B. OSPF-TE
C. NETCONF
D. BGP-LS

Answer: B,D

Question No : 19

What are two Microservices provided by contrail services orchestration? (Choose two)

A. REST API server
B. Fabric Manager
C. VIM director
D. Security director

Answer: B,D

Question No : 20

Which mechanism allows tenants to interconnect across an overlay network?

A. tunnels
B. subnets
C. EBGP connections
D. P2P OSPF adjacencies

Answer: A

Question No : 21

Your company has three connections consisting of MPLS, Internet, and wireless connections, respectively. You must separate traffic according to the type of application sending that traffic across the three links.

Which product will facilitate this requirement?

A. Contrail SD-WAN
B. Contrail Cloud
C. Contrail networking
D. Contrail SD-LAN

Answer: A

Question No : 22

Which statement is correct about alarms in AppFormix?

A. Static alarm are compared against fixed thresholds
B. Alarm thresholds cannot be changed by the user
C. Alarm actions cannot be change by the user
D. Static alarms are compared against historical data

Answer: A

Question No : 23

What are two different modes available for the vMX on KVM that are based on CPU and memory availability? (choose two)

A. Performance
B. Basic
C. Lite
D. Enhanced

Answer: A,C

Question No : 24

Which CSO component enables the monitoring of the CSO system to provide real-time data about the Cloud CPE solution?

A. Administration Portal
B. AppFormix
C. Designer Tools
D. Customer Portal
E. Service and Infrastructure Monitor

Answer: E

Question No : 25

Which two statements describe cloud CPE?(Choose two.)

A. Cloud CPE require heavy investment in vendor-specific hardware
B. Cloud CPE encourages administrators to use all-in-one appliances
C. Cloud CPE allows multivendor, open support of software-based functions
D. Cloud CPE eliminates the need for investing in expensive hardware

Answer: B,D

Question No : 26

What is used to provide secure access to a vSRX in a public cloud?

A. authorized key pairs
B. SSH key pairs
C. private key pairs
D. public key pairs

Answer: B

Question No : 27

Which statement is true regarding an OpenFlow controller-based software defined network?
