[Total Questions: 377]

Topic break down

Topic	No. of Questions
Topic 1: Fabrikam, Inc.	8
Topic 2: Contoso, Ltd	8
Topic 3: Litware inc	11
Topic 4: Mix Questions	350

Topic 1, Fabrikam, Inc.

Overview

Existing Environment

Fabrikam, Inc. is a distribution company that has 500 employees and 100 contractors.

Active Directory

The network contains an Active Directory forest named fabrikam.com. The forest is synced to Microsoft Azure Active Directory (Azure AD). All the employees are assigned Microsoft 365 E3 licenses.

The domain contains a user account for an employee named User10.

Client Computers

All the employees have computers that run Windows 10 Enterprise. All the computers are installed without Volume License Keys. Windows 10 license keys are never issued.

All the employees register their computer to Azure AD when they first receive the computer.

User10 has a computer named Computer10.

All the contractors have their own computer that runs Windows 10. None of the computers are joined to Azure AD.

Operational Procedures

Fabrikam has the following operational procedures:

Updates are deployed by using Windows Update for Business.

When new contractors are hired, administrators must help the contractors configure the following settings on their computer:

- User certificates
- Browser security and proxy settings
- Wireless network connection settings

Security policies

The following security policies are enforced on all the client computers in the domain:

-  All the computers are encrypted by using BitLocker Drive Encryption (BitLocker). BitLocker recovery information is stored in Active Directory and Azure AD.

- ✍ The local Administrators group on each computer contains an enabled account named LocalAdmin.
- ✍ The LocalAdmin account is managed by using Local Administrator Password Solution (LAPS).

Problem Statements

Fabrikam identifies the following issues:

- ✍ Employees in the finance department use an application named Application1. Application1 frequently crashes due to a memory error. When Application1 crashes, an event is written to the application log and an administrator runs a script to delete the temporary files and restart the application.
- ✍ When employees attempt to connect to the network from their home computer, they often cannot establish a VPN connection because of misconfigured VPN settings.
- ✍ An employee has a computer named Computer11. Computer11 has a hardware failure that prevents the computer from connecting to the network.
- ✍ User10 reports that Computer10 is not activated.

Technical requirements

Fabrikam identifies the following technical requirements for managing the client computers:

- ✍ Provide employees with a configuration file to configure their VPN connection.
- ✍ Use the minimum amount of administrative effort to implement the technical requirements.
- ✍ Identify which employees' computers are noncompliant with the Windows Update baseline of the company.
- ✍ Ensure that the service desk uses Quick Assist to take remote control of an employee's desktop during support calls.
- ✍ Automate the configuration of the contractors' computers. The solution must provide a configuration file that the contractors can open from a Microsoft SharePoint site to apply the required configurations.

Question No : 1 - (Topic 1)

An employee reports that she must perform a BitLocker recovery on her laptop. The employee does not have her BitLocker recovery key but does have a Windows 10 desktop computer.

What should you instruct the employee to do from the desktop computer?

- A. Run `themanage-bde.exe –statuscommand`
- B. From BitLocker Recovery Password Viewer, view the computer object of the laptop
- C. Go to <https://account.activedirectory.windowsazure.com> and view the user account profile

D. Run theEnable-BitLockerAutoUnlockcmdlet

Answer: C

Explanation:

References:

<https://celedonpartners.com/blog/storing-recovering-bitlocker-keys-azure-active-directory/>

Question No : 2 HOTSPOT - (Topic 1)

You need to reduce the amount of time it takes to restart Application1 when the application crashes.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE:Each correct selection is worth one point.

Tool to use:

▼
Event Viewer
Performance Monitor
Windows Memory Diagnostic
Windows Performance Analyzer

Task to perform:

▼
Create a subscription
Attach a task to an event
Enable an event trace provider
Create an alert

Answer:

Tool to use: ▼

Event Viewer
Performance Monitor
Windows Memory Diagnostic
Windows Performance Analyzer

Task to perform: ▼

Create a subscription
Attach a task to an event
Enable an event trace provider
Create an alert

Explanation:

Tool to use: ▼

Event Viewer
Performance Monitor
Windows Memory Diagnostic
Windows Performance Analyzer

Task to perform: ▼

Create a subscription
Attach a task to an event
Enable an event trace provider
Create an alert

Question No : 3 HOTSPOT - (Topic 1)

You need to implement a solution to configure the contractors' computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE:Each correct selection is worth one point.

Tool to use:

▼
Microsoft Deployment Toolkit (MDT)
Windows AutoPilot
Windows Configuration Designer
Windows Deployment Services (WDS)

File type to create:

▼
CAB
PPKG
WIM
XML

Answer:

Tool to use:

▼
Microsoft Deployment Toolkit (MDT)
Windows AutoPilot
Windows Configuration Designer
Windows Deployment Services (WDS)

File type to create:

▼
CAB
PPKG
WIM
XML

Explanation:

Tool to use:

▼
Microsoft Deployment Toolkit (MDT)
Windows AutoPilot
Windows Configuration Designer
Windows Deployment Services (WDS)

File type to create:

▼
CAB
PPKG
WIM
XML

Question No : 4 - (Topic 1)

You need to take remote control of an employee's computer to troubleshoot an issue.

What should you send to the employee to initiate a remote session?

- A. a numeric security code
- B. a connection file
- C. an Easy Connect request
- D. a password

Answer: A

Explanation: References:

<https://support.microsoft.com/en-us/help/4027243/windows-10-solve-pc-problems-with-quick-assist>

Question No : 5 - (Topic 1)

You need to recommend a solution to monitor update deployments.

What should you include in the recommendation?

- A. Windows Server Update (WSUS)
- B. the Update Management solution in Azure Automation
- C. the Update Compliance solution in Azure Log Analytics
- D. the Azure Security Center

Answer: C

Explanation: References:

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-monitor>

Question No : 6 - (Topic 1)

You need to ensure that User10 can activate Computer10.

What should you do?

- A.** Request that a Windows 10 Enterprise license be assigned to User10, and then activate Computer10.
- B.** From the Microsoft Deployment Toolkit (MDT), add a Volume License Key to a task sequence, and then redeploy Computer10.
- C.** From System Properties on Computer10, enter a Volume License Key, and then activate Computer10.
- D.** Request that User10 perform a local AutoPilot Reset on Computer10, and then activate Computer10.

Answer: D

Explanation: References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-requirements-licensing>

Question No : 7 - (Topic 1)

You need to sign in as LocalAdmin on Computer11.

What should you do first?

- A.** From the LAPS UI tool, view the administrator account password for the computer object of Computer11.
- B.** From Local Security Policy, edit the policy password settings on Computer11.
- C.** From the LAPS UI tool, reset the administrator account password for the computer object of Computer11.
- D.** From Microsoft Intune, edit the policy password settings on Computer11.

Answer: A

Explanation: References:

<https://technet.microsoft.com/en-us/mt227395.aspx>

Question No : 8 - (Topic 1)

You need to recommend a solution to configure the employee VPN connections.

What should you include in the recommendation?

- A. Remote Access Management Console
- B. Group Policy Management Console (GPMC)
- C. Connection Manager Administration Kit (CMAK)
- D. Microsoft Intune

Answer: D

Explanation:

References:

https://docs.microsoft.com/en-us/windows-server/remote/remote-access/vpn/always-on-vpn/deploy/vpn-deploy-client-vpn-connections#bkmk_ProfileXML

Topic 2, Contoso, Ltd

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

Contoso has IT, human resources (HR), and finance departments.

Contoso recently opened a new branch office in San Diego. All the users in the San Diego office work from home.

Existing environment

Contoso uses Microsoft 365.

The on-premises network contains an Active Directory domain named contoso.com. The domain is synced to Microsoft Azure Active Directory (Azure AD).

All computers run Windows 10 Enterprise.

You have four computers named Computer1, Computer2, Computer3, and ComputerA. ComputerA is in a workgroup on an isolated network segment and runs the Long Term Servicing Channel version of Windows 10. ComputerA connects to a manufacturing system and is business critical. All the other computers are joined to the domain and run the Semi-Annual Channel version of Windows 10.

In the domain, you create four groups named Group1, Group2, Group3, and Group4.

Computer2 has the local Group Policy settings shown in the following table.

Policy	Security Setting
Access this computer from the network	Group1
Deny access to this computer from the network	Group2
Allow log on through Remote Desktop Services	Group3
Deny log on through Remote Desktop Services	Group4

The computers are updated by using Windows Update for Business.

The domain has the users shown in the following table.

Name	Member of
User1	Domain Admins, Domain Users
User2	Administrators, Domain Users
User3	Account Operators, Domain Users
User4	Domain Users
User5	Domain Users, Guests
User6	Group2, Group3, Domain Users

Computer1 has the local users shown in the following table.

Name	Member of
User11	Administrators
User12	Users
User13	Guests

Requirements

Planned Changes

Contoso plans to purchase computers preinstalled with Windows 10 Pro for all the San Diego office users.

Technical requirements

Contoso identifies the following technical requirements:

- ✍ The computers in the San Diego office must be upgraded automatically to Windows 10 Enterprise and must be joined to Azure AD the first time a user starts each new computer. End users must not be required to accept the End User License Agreement (EULA).
- ✍ Helpdesk users must be able to troubleshoot Group Policy object (GPO) processing on the Windows 10 computers. The helpdesk users must be able to identify which Group Policies are applied to the computers.
- ✍ Users in the HR department must be able to view the list of files in a folder named D:\Reports on Computer3.
- ✍ ComputerA must be configured to have an Encrypting File System (EFS) recovery agent.
- ✍ Quality update installations must be deferred as long as possible on ComputerA.
- ✍ Users in the IT department must use dynamic lock on their primary device.
- ✍ User6 must be able to connect to Computer2 by using Remote Desktop.
- ✍ The principle of least privilege must be used whenever possible.
- ✍ Administrative effort must be minimized whenever possible.
- ✍ Assigned access must be configured on Computer1.

Question No : 9 - (Topic 2)

You need to meet the technical requirement for the IT department users.

What should you do first?

- A. Issue computer certificates
- B. Distribute USB keys to the IT department users.
- C. Enable screen saver and configure a timeout.
- D. Turn on Bluetooth.

Answer: D

Explanation: References:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you-step-away-from>

Question No : 10 - (Topic 2)

You need to meet the technical requirements for EFS on ComputerA.

What should you do?

- A. Runcertutil.exe, and then add a certificate to the local computer certificate store.
- B. Runcipher.exe, and then add a certificate to the local computer certificate store.
- C. Runcipher.exe, and then add a certificate to the local Group Policy.
- D. Runcertutil.exe, and then add a certificate to the local Group Policy.

Answer: D

Explanation: References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-and-verify-an-efs-dra-certificate>

Question No : 11 HOTSPOT - (Topic 2)

You need to meet the technical requirements for the helpdesk users.

What should you do? To answer, select the appropriate options in the answer area.

NOTE:Each correct selection is worth one point.

Add the help desk users to:

<input type="checkbox"/>	The local Administrators group on the Windows 10 computers
<input type="checkbox"/>	The Domain Computrers group in the domain group
<input type="checkbox"/>	The Event Log Readers group in the domain group
<input type="checkbox"/>	The local Event Log Readers group on the Windows 10 computers
<input type="checkbox"/>	The Group Policy Creators Owners group in the domain group
<input type="checkbox"/>	The local Power Users group on the Windows 10 computers

Troubleshooting tool that the helpdesk users should use:

<input type="checkbox"/>	Get-GPOReport
<input type="checkbox"/>	GPRresult
<input type="checkbox"/>	GPOUpdate
<input type="checkbox"/>	Group Policy Object Editor

Answer:

Add the help desk users to:

- ▼
- The local Administrators group on the Windows 10 computers
- The Domain Computrers group in the domain group
- The Event Log Readers group in the domain group
- The local Event Log Readers group on the Windows 10 computers
- The Group Policy Creators Owners group in the domain group
- The local Power Users group on the Windows 10 computers

Troubleshooting tool that the helpdesk users should use:

- ▼
- Get-GPOReport
- GPRresult
- GPOupdate
- Group Policy Object Editor

Explanation:

Add the help desk users to:

- ▼
- The local Administrators group on the Windows 10 computers
- The Domain Computrers group in the domain group
- The Event Log Readers group in the domain group
- The local Event Log Readers group on the Windows 10 computers
- The Group Policy Creators Owners group in the domain group
- The local Power Users group on the Windows 10 computers

Troubleshooting tool that the helpdesk users should use:

- ▼
- Get-GPOReport
- GPRresult
- GPOupdate
- Group Policy Object Editor

References:

<https://www.itprotoday.com/compute-engines/what-group-policy-creator-owners-group>

Question No : 12 - (Topic 2)

You need to meet the quality update requirement for ComputerA.

For how long should you defer the updates?

- A. 14 days
- B. 10 years
- C. 5 years
- D. 180 days
- E. 30 days

Answer: E

Explanation: References:

<https://www.thewindowsclub.com/delay-defer-feature-updates-365-days-windows-10>

Question No : 13 - (Topic 2)

You need to meet the technical requirement for User6.

What should you do?

- A. Add User6 to the Remote Desktop Users group in the domain.
- B. Remove User6 from Group2 in the domain.
- C. Add User6 to the Remote Desktop Users group on Computer2.
- D. Add User6 to the Administrators group on Computer2.

Answer: B

Question No : 14 - (Topic 2)

You need to meet the technical requirements for the San Diego office computers. Which Windows 10 deployment method should you use?

- A. wipe and load refresh
- B. Windows Autopilot
- C. provisioning Packages
- D. in-place upgrade

Answer: B

Explanation: References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

Question No : 15 HOTSPOT - (Topic 2)

You need to meet the technical requirement for Computer1.

What should you do? To answer, select the appropriate options in the answer area.

User who should configure assigned access:

	▼
User1	
User2	
User3	
User11	
User12	

Configure assigned access for:

	▼
User4	
User5	
User12	
User13	

Answer:

User who should configure assigned access:

	▼
User1	
User2	
User3	
User11	
User12	

Configure assigned access for:

	▼
User4	
User5	
User12	
User13	

Explanation:

User who should configure assigned access:

	▼
User1	
User2	
User3	
User11	
User12	

Configure assigned access for:

	▼
User4	
User5	
User12	
User13	

Question No : 16 HOTSPOT - (Topic 2)

You need to meet the technical requirements for the HR department users.

Which permissions should you assign to the HR department users for the D:\Reports folder? To answer, select the appropriate permissions in the answer area.

NOTE:Each correct selection is worth one point.

Permission Entry for Reports

Principal: HR (CONTOSO\HR) [Select a principal](#)

Type: Allow

Applies to: This folder only

Advanced permissions: [Show basic permissions](#)

- Full control
- Traverse folder / execute file
- List folder / read data
- Read attributes
- Read extended attributes
- Create files / write data
- Create folders / append data
- Write attributes
- Write extended attributes
- Delete subfolders and files
- Delete
- Read permissions
- Change permissions
- Take ownership

Only apply these auditing settings to objects and/or containers within this container Clear all

Add a condition to limit the scope of this auditing entry. Security events will be logged only if conditions are met.

[Add a condition](#)

Answer:

Topic 3, Litware inc Case Study

This is a case study. **Case studies are not timed separately. You can use as much exam time as you would like to complete each case.** However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question**

button to return to the question.

Overview

General Overview

Litware, Inc. is a consulting company that has a main office in Montreal and branch offices in Seattle and New York.

Environment

Existing Environment

The network contains an on-premises Active Directory domain named litware.com. The domain contains the computers shown in the following table.

Name	Operating system	Configuration	IP address
DC1	Windows Server 2019	Domain controller	192.168.10.1/24
Server1	Windows Server 2019	Domain-joined	192.168.10.11/24
Computer1	Windows 10	Domain-joined	192.168.10.20/24
Computer2	Windows 10	Domain-joined	192.168.10.21/24
Computer3	Windows 10	Workgroup	192.168.10.30/24

The network that uses 192.168.10.0/24 connects to the internet by using a Network Address Translation (NAT) device.

Windows Admin Center is installed on Server1.

The domain contains the groups shown in the following table.

Name	Type
Group1	Global
Group2	Global
Group3	Universal

The domain contains the users shown in the following table.

Name	Member of
Admin1	Domain Admins
User1	Group1
User2	Group2
User3	Group1, Group2

Computer1 Configuration

Computer1 contains the local user accounts shown in the following table.

Name	Member of
User11	Administrators
User12	Power Users
User13	Device Owners

Computer1 contains a folder named D:\Folder1 that has permission inheritance disabled.

Computer1 contains a file named D:\Folder1\Report.docx that has the permissions shown in the following table.

Type	Principal	Access	Inherited from
Deny	Litware\Group2	Write	D:\Folder1
Allow	Litware\Group2	Read	D:\Folder1
Allow	Litware\Group1	Full control	D:\Folder1

D:\Folder1\Report.docx has auditing configured as shown in the following table.

Type	Principal	Access	Inherited from
Fail	Litware\Group1	Read, Write	None
Success	Litware\Group2	Read	None

The Local Computer Policy for Computer1 is configured as shown in the following table.

Policy	Option
Audit Policy\Audit object access	Success: Enabled Failure: Disabled

Windows Defender Firewall for Computer1 has the rules shown in the following table.

Direction	Protocol	Local Port	Remote Port	Action	Profile
Inbound	ICMPv4	Any	Any	Allow	Private
Outbound	ICMPv4	Any	Any	Allow	All

Computer2 Configuration

Computer2 contains the local user accounts shown in the following table.

Name	Member of
User21	Administrators
User22	Power Users
User23	Users

Group1 and Group2 are members of the Remote Desktop Users group.

The Local Computer Policy for Computer2 is configured as shown in the following table.

Policy	Setting
User Rights Assignment\Deny access to this computer from the network	Group1
User Rights Assignment\Deny log on locally	Group2

Windows Defender Firewall for Computer2 has the rules shown in the following table.

Direction	Protocol	Local Port	Remote Port	Action	Profile
Inbound	ICMPv4	Any	Any	Allow	Public
Outbound	ICMPv4	Any	Any	Allow	Private

Computer3 Configuration

Computer3 contains the local user accounts shown in the following table.

Name	Member of
User31	Administrators
User32	Power Users
User33	Users

Windows Defender Firewall for Computer3 has the rules shown in the following table.

Direction	Protocol	Local Port	Remote Port	Action	Profile
Inbound	ICMPv4	Any	Any	Allow	All
Outbound	ICMPv4	Any	Any	Allow	Private

Requirements and Planned Changes

Planned Changes

Litware plans to make the following changes on Computer1:

-  Grant User1 Allow Full control permissions to D:\Folder1\Report.docx.
-  Grant User2 Allow Full control permissions to D:\Folder1\Report.docx.
-  Grant User3 Allow Full control permissions to D:\Folder1.

Technical Requirements

Litware identifies the following technical requirements:

-  Configure custom Visual Effect performance settings for Computer1.
-  Manage Computer2 by using Windows Admin Center.
-  Minimize administrative effort.

Delivery Optimization on the computers that run Windows 10 must be configured to meet the following requirements:

-  Content must be downloaded only from an original source.
-  Downloading content from peer cache clients must be prevented.
-  Downloads must be optimized by using the Delivery Optimization cloud service.

Question No : 17 HOTSPOT - (Topic 3)

Which Windows 10 computers can you ping successfully from Computer1 and Computer2? To answer, select the appropriate options in the answer area.

NOTE:Each correct selection is worth one point.

Computer1:

Computer2 only
Computer3 only
Computer2 and Computer3
No Windows 10 computers

Computer2:

Computer1 only
Computer3 only
Computer1 and Computer3
No Windows 10 computers

Answer:

Computer1:

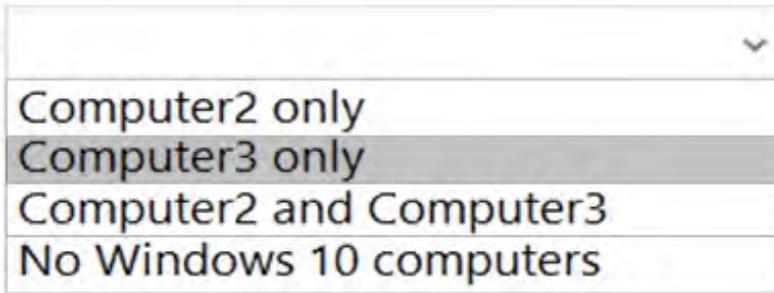

Computer2 only
Computer3 only
Computer2 and Computer3
No Windows 10 computers

Computer2:

Computer1 only
Computer3 only
Computer1 and Computer3
No Windows 10 computers

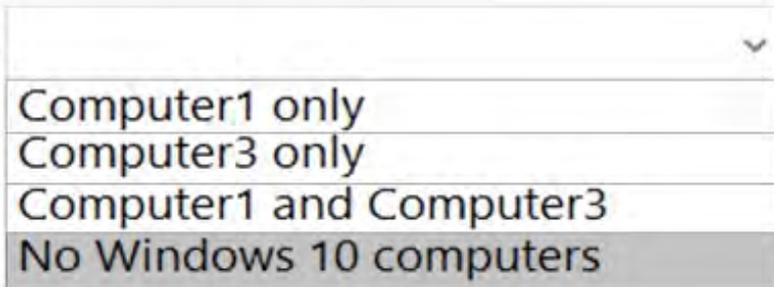

Explanation:

Computer1:

A dropdown menu for 'Computer1' with four options: 'Computer2 only', 'Computer3 only' (highlighted), 'Computer2 and Computer3', and 'No Windows 10 computers'.

Computer2:

A dropdown menu for 'Computer2' with four options: 'Computer1 only', 'Computer3 only', 'Computer1 and Computer3', and 'No Windows 10 computers' (highlighted).

Graphical user

interface, text, application, chat or text message

Description automatically generated

Box 1: Computer3 only.

Computer1 and Computer2 are domain joined so both will be using the Domain profile. The firewall rules on Computer1 allow outbound ICMP on all profiles so outbound ICMP will be allowed on the Domain profile.

The firewall rules on Computer2 allow inbound ICMP on the Public profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot be pinged.

The firewall rules on Computer3 allow inbound ICMP on all profiles. Therefore, Computer3 will not block the inbound pings.

Box 2: No Windows 10 computers.

The firewall rules on Computer2 allow outbound ICMP on the Private profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot ping any computers.

Question No : 18 - (Topic 3)

You need to configure Delivery Optimization to meet the technical requirements.

Which download mode should you use?

- A. Simple (99)
- B. Group (2)
- C. Internet (3)
- D. HTTP Only (0)
- E. Bypass (100)

Answer: D

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization-reference#download-mode>

Question No : 19 - (Topic 3)

Which users can create a new group on Computer3?

- A. User31 only
- B. User1 and User32 only
- C. Admin1 and User31 only
- D. Admin1, User31, and User32 only

Answer: C

Reference:

https://ss64.com/nt/syntax-security_groups.html

Question No : 20 - (Topic 3)

On Computer1, you need to configure the custom Visual Effects performance settings.

Which user accounts can you use?

- A. Admm1,User11, and User13 only
- B. Admin1 only
- C. Admin1, User11, and User12 only
- D. Admin1, User11, User12, and User13
- E. Admin1 and User11 only

Answer: D

Question No : 21 CORRECT TEXT - (Topic 3)

Which users can sign in to Computer3 when the computer starts in Safe Mode?

- A- User31 only
- B. User31 and User32 only
- C. User31 andAdmin1 only
- D. User31, User 32, User33, and Admin1
- E. User31,User32, and User33 only

Answer: A

Explanation:

Only users with membership of the local Administrators group can log on to a computer in safe mode. Admin1 cannot log in because Computer3 is not joined to the domain.

References:

<https://support.microsoft.com/en-us/windows/advanced-startup-options-including-safe-mode-b90e7808-80b5-a291-d4b8-1a1af602b617>

Question No : 22 - (Topic 3)

Which users can sign in to Computer2 by using Remote Desktop?

- A. Admin1 only
- B. User 1 only
- C. Admin1 and User2 only
- D. Admin1, User1, User2, and User3
- E. User2 only

Answer: C

<https://4sysops.com/archives/user-rights-assignment-in-windows-server-2016/>

Question No : 23 HOTSPOT - (Topic 3)

You implement the planned changes for Computer1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE:Each correct selection is worth one point.

Statements	Yes	No
User1 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User2 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User3 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>

Answer:

Statements	Yes	No
User1 can write to D:\Folder1\Report.docx.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Statements	Yes	No
User1 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User2 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User3 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>

A screenshot of

a computer

Description automatically generated with low confidence

Box 1: Yes

User1 already has full control access through membership of Group1. Therefore, User1 can write to the file.

Box 2: No

The planned changes will grant User2 full control access to the file. However, User2 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User2 will not be able to write to the file.

Box 3: No

The planned changes will grant User3 full control access to the folder. That permission will be inherited by the file. However, User3 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User3 will not be able to write to the file.

Question No : 24 HOTSPOT - (Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input type="radio"/>

Answer:

Answer Area

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input checked="" type="radio"/>	<input type="radio"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input checked="" type="radio"/>	<input type="radio"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input checked="" type="radio"/>

Question No : 25 - (Topic 3)

You need to ensure that you can manage Computer2 by using Windows Admin Center on Server1.

What should you do on Computer2?

- A. Install the Remote Server Administration Tool (RSAT) optional features.
- B. Run the winrm quickconfig command.
- C. Set the Windows Management Service Startup type to Automatic and start the service.
- D. Run the Sec-Location cmdlet.

Answer: B
