**Question No : 1**

Application Settings allow you to\_\_\_\_\_.

- A. simulate data in an environment for testing purposes
- B. automate the application migration process
- C. execute connectors in parallel to improve performance
- D. store references to an external system connected to an application

**Answer: D**

**Question No : 2**

You are asked to create a custom status named Open-Review. This status is to be applied to assignments in one application.

How do you satisfy the request?

- A. Create a Field Value record named Open-Review for .pyStatusWork with the Apply To class set to the class group.
- B. Add the Open-Review status to the Application record for the application.
- C. Circumstance the existing Open Field Value record on the application name and update the status value to Open-Review.
- D. Create a Field Value record named Open-Review for .pyStatusWork and configure an Access When record to apply the status to the correct application.

**Answer: D**

**Question No : 3**

A flow action calls a pre-processing data transform to initiate values. There are several flow actions available for the assignment. You want to make sure that the values are only initiated once for each flow action.

How do you implement a solution?

- A. Add logic to the pre-processing data transform to test if values were already initiated.
- B. Do nothing. The pre-processing data transform is only called once for each assignment.
- C. Make sure that the flow action does not have the highest likelihood since it will always be invoked.
- D. Configure the data transform as post-processing instead of pre-processing.

**Answer: A**

**Question No : 4**

When deploying mashup code in a webpage, which option is necessary to ensure that Pega Platform accepts incoming requests?

- A. Ensure the host is configured to support HTTPS.
- B. Establish a private tunnel from the host to Pega Platform.
- C. Enable authentication policies on Pega Platform.
- D. Add the host URL in the Pega application.

**Answer: A**

**Question No : 5**

Which two statements are valid regarding Pega Web Mashups? (Choose two.)

- A. A mashup display starts by calling either a flow or a harness from a Pega application.
- B. Pega Platform limits a mashup to working on existing cases.
- C. A mashup can allow access to Dev Studio for full system configuration.
- D. A user can view their worklist in an external portal and select items to take action on.

**Answer: A,D**

**Question No : 9**

The primary purpose of a production ruleset is to allow rules to be

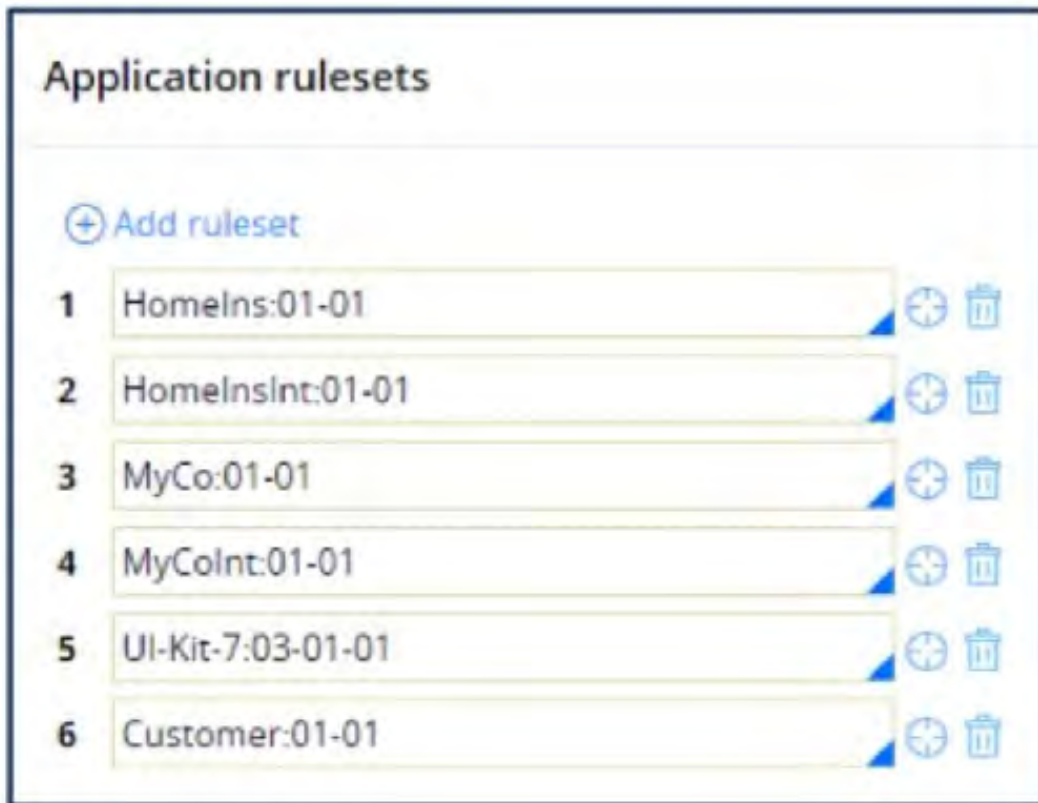

- A. tested in a production environment
- B. updated in a production environment
- C. reused in multiple production environments
- D. migrated to a production environment

**Answer: D**

**Question No : 10**

In the following example, the Homelns, HomelnsInt, and Customer rulesets are configured for application validation. MyCo and MyColnt are configured for ruleset validation. MyCo lists MyColnt and Customer as its prerequisites, and the prerequisite for MyColnt is Pega-ProcessCommander.

Which of the following statements is correct?

- A. Rules in MyCo can reference rules in HomeInsInt.
- B. Rules in MyCo can reference rules in HomeIns.
- C. Rules in Customer can reference rules in HomeIns.
- D. Rules in MyCoInt can reference rules in Customer.

**Answer: C**

#### Question No : 11

In which two scenarios is it a Pega best practice to use Pega Web Mashup over a Pega API integration? (Choose two.)

- A. Minimal resources are assigned to update Pega Platform for each new release.
- B. Developers have access to only App Studio when configuring the integration.
- C. Users are expected to create cases, open assignments, and manage data privacy.
- D. The application is built on Pega Platform version 8.2 using UI Kit.

**Answer: B,C**

#### Question No : 12

You are preparing to create a new major version of an application ruleset in which there are multiple minor and patch versions.

How do you create the new ruleset version?

- A. Use the Ruleset Maintenance wizard to skim the relevant ruleset versions to copy the highest version of existing rules to the new ruleset version.
- B. Use the Ruleset Maintenance wizard to merge the existing rules in the relevant ruleset versions to the new version.
- C. Use the Application Structure landing page to lock and roll the existing ruleset versions to the new version.
- D. Create a new application ruleset using the appropriate version number, then copy the highest version of existing rules into the new ruleset version.

**Answer: A**

**Question No : 13**

A music production company's application contains the following classes:

*UPlusMusic-Production-Work-  
UPlusMusic-Production-Work-Studio-
